Overview of Industrial Process Automation K.L.S. Sharma, 2016-10-25 *Overview of Industrial Process Automation* Second Edition introduces the basics of philosophy technology terminology and practices of modern automation systems through the presentation of updated examples illustrations case studies and images This updated edition adds new developments in the automation domain and its reorganization of chapters and appendixes provides better continuity and seamless knowledge transfer Manufacturing and chemical engineers involved in factory and process automation and students studying industrial automation will find this book to be a great comprehensive resource for further explanation and study Presents a ready made reference that introduces all aspects of automation technology in a single place with day to day examples Provides a basic platform for the understanding of industry literature on automation products systems and solutions Contains a guided tour of the subject without the requirement of any previous knowledge on automation Includes new topics such as factory and process automation IT OT Integration ISA 95 Industry 4 0 IoT etc along with safety systems in process plants and machines

Intelligent Manufacturing Management Systems Kamalakanta Muduli, V. P. Kommula, Devendra K. Yadav, M. Chithirai Pon Selvan, Jayakrishna Kandasamy, 2023-05-31 **INTELLIGENT MANUFACTURING MANAGEMENT SYSTEMS** The book explores the latest manufacturing techniques in relation to AI and evolutionary algorithms that can monitor and control the manufacturing environment The concepts that pertain to the application of digital evolutionary technologies in the sphere of industrial engineering and manufacturing are presented in this book A few chapters demonstrate stepwise discussion case studies structured literature review rigorous experimentation results and applications Further chapters address the challenges encountered by industries in integrating these digital technologies into their operational activities as well as the opportunities for this integration In addition the reader will find Systemic explanations of the unique characteristics of big data cloud computing and AI used for decision making in intelligent production systems Highlights of the current and highly relevant topics in manufacturing management Structured presentations resolving the issues being faced by many real world applications in a broad range of areas such as smart supply chains knowledge management intelligent inventory management IoT adoption in manufacturing management and more Intelligent techniques for sustainable practices in industrial waste management Audience The book will be used by researchers industry engineers and data scientists AI specialists working in industrial engineering mechanical engineering production engineering manufacturing engineering and operations and supply chain management The book will also be valuable to the service sector industry such as logistics and those implementing smart cities

Industrial Process Automation Systems B.R. Mehta, Y. Jaganmohan Reddy, 2014-11-26 *Industrial Process Automation Systems Design and Implementation* is a clear guide to the practicalities of modern industrial automation systems Bridging the gap between theory and technician level coverage it offers a pragmatic approach to the subject based on industrial experience taking in the latest technologies and professional practices Its comprehensive coverage of concepts

and applications provides engineers with the knowledge they need before referring to vendor documentation while clear guidelines for implementing process control options and worked examples of deployments translate theory into practice with ease This book is an ideal introduction to the subject for junior level professionals as well as being an essential reference for more experienced practitioners Provides knowledge of the different systems available and their applications enabling engineers to design automation solutions to solve real industry problems Includes case studies and practical information on key items that need to be considered when procuring automation systems Written by an experienced practitioner from a leading technology company

Industrial Automation Technologies Chanchal Dey, Sunit Kumar Sen, 2020-05-28 The book begins with an overview of automation history and followed by chapters on PLC DCS and SCADA describing how such technologies have become synonymous in process instrumentation and control The book then introduces the niche of Fieldbuses in process industries It then goes on to discuss wireless communication in the automation sector and its applications in the industrial arena The book also discusses the all pervading IoT and its industrial cousin IIoT which is finding increasing applications in process automation and control domain The last chapter introduces OPC technology which has strongly emerged as a defacto standard for interoperable data exchange between multi vendor software applications and bridges the divide between heterogeneous automation worlds in a very effective way Key features Presents an overall industrial automation scenario as it evolved over the years Discusses the already established PLC DCS and SCADA in a thorough and lucid manner and their recent advancements Provides an insight into today's industrial automation field Reviews Fieldbus communication and WSNs in the context of industrial communication Explores IIoT in process automation and control fields Introduces OPC which has already carved out a niche among industrial communication technologies with its seamless connectivity in a heterogeneous automation world Dr Chanchal Dey is Associate Professor in the Department of Applied Physics Instrumentation Engineering Section University of Calcutta He is a reviewer of IEEE Elsevier Springer Acta Press Sage and Taylor Francis Publishers He has more than 80 papers in international journals and conference publications His research interests include intelligent process control using conventional fuzzy and neuro fuzzy techniques Dr Sunit Kumar Sen is an ex professor Department of Applied Physics Instrumentation Engineering Section University of Calcutta He was a coordinator of two projects sponsored by AICTE and UGC Government of India He has published around 70 papers in international and national journals and conferences and has published three books the last one was published by CRC Press in 2014 He is a reviewer of Measurement Elsevier His field of interest is new designs of ADCs and DACs
