Artificial Intelligence, Ethics, and the Digital Society: Pathways to Sustainable Development Anju

Beniwal, 2025-06-25 In recent years the rapid advancement of technology particularly Artificial Intelligence AI and digital innovations has fundamentally transformed every dimension of human society These developments have not only reshaped our economies and lifestyles but have also raised critical ethical environmental and sociological questions This edited volume brings together a diverse range of scholarly contributions that explore the intersections between technological progress sustainable development and social well being The chapters included in this volume reflect contributions from scholars and researchers across India encompassing disciplines such as Sociology History Economics Political Science and Liberal Education The themes range from the role of AI in everyday life and the impact of smart cities on environmental management to localized frameworks of sustainability the digital transformation of food systems and the media's influence on social awareness campaigns Special emphasis is placed on how Artificial Intelligence and digital technologies can both aid and challenge the achievement of Sustainable Development Goals SDGs Simultaneously the ethical frameworks surrounding these innovations are explored to ensure technology serves humanity without compromising core societal values This book also examines grassroots realities and region specific concerns such as sustainable practices in Assam the digitalization of India's organic food sector and menstrual taboos across cultures providing an inclusive and grounded understanding of the diverse sociocultural contexts in which sustainability must be achieved I hope that this volume serves not only as a valuable academic resource but also as a catalyst for interdisciplinary dialogue and policy innovation It is my belief that such collaborative and ethical inquiry is essential to building a more just equitable and sustainable society in the face of the 21st century's challenges I am grateful to all the contributors who have enriched this volume with their research and insights Their dedication to critical inquiry and commitment to social change is what makes this collection both timely and transformative

In AI We Trust Helga Nowotny, 2021-08-19 One of the most persistent concerns about the future is whether it will be dominated by the predictive algorithms of AI and if so what this will mean for our behaviour for our institutions and for what it means to be human AI changes our experience of time and the future and challenges our identities yet we are blinded by its efficiency and fail to understand how it affects us At the heart of our trust in AI lies a paradox we leverage AI to increase our control over the future and uncertainty while at the same time the performativity of AI the power it has to make us act in the ways it predicts reduces our agency over the future This happens when we forget that that we humans have created the digital technologies to which we attribute agency These developments also challenge the narrative of progress which played such a central role in modernity and is based on the hubris of total control We are now moving into an era where this control is limited as AI monitors our actions posing the threat of surveillance but also offering the opportunity to reappropriate control and transform it into care As we try to adjust to a world in which algorithms

robots and avatars play an ever increasing role we need to understand better the limitations of AI and how their predictions affect our agency while at the same time having the courage to embrace the uncertainty of the future Social Engineering and Human Hacking Erfan Koza,Asiye Öztürk,Michael Willer,2025-12-07 Discover the psychological tricks and techniques used by human hackers to exploit your personal emotions traits and digital behavior patterns in order to deliberately compromise information security This textbook offers a playful and engaging approach to understanding how social engineering works and how to effectively defend yourself against it You will also learn how to sharpen your perception control your emotions and develop effective defense strategies to protect your data and your organization from attackers tactics Equipped with psychological thinking models and counter strategies you will be ready to face the challenges of the modern security landscape **STFU** Dan Lyons,2023-03-07 Entertaining illuminating and inspiring More than a book it s a public service announcement that we d all do well to well STFU and listen to Sarah Knight New York Times bestselling author of *Calm the F ck Down* New York Times bestselling author Dan Lyons is here to tell you and don t take this the wrong way that you really need to shut the f ck up Our noisy world has trained us to think that those who get in the last word win when in fact it s those who know how to stay silent who really hold the power STFU is a book that unlocks this power and will change your life freeing you to focus on what matters Lyons combines leading behavioral science with actionable advice on how to communicate with intent think critically and open your mind and ears to the world around you Talk less get more That s what STFU is all about Prescriptive informative and addictively readable STFU gives you the tools to become your better self whether that s in the office at home online or in your most treasured relationships Because after all what you say is who you are So take a deep breath turn the page and quietly change your life *Deepfakes* Graham Meikle,2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone s face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers **Visual Methods for Digital Research** Sabine Niederer,Gabriele Colombo,2024-06-19 Over the last decade images have become a key feature of digital culture at the same time they have made a mark on a wide range of research practices Visual Methods for

Transformative Museum Experiences Licia Calvi,Arnold Vermeeren,Amalia Sabiescu,2025-07-17 Following on the volume *Museum Experience Design 2018* this book acknowledges the changing role of

museums in society with a focus on designing experiences as vehicles for transformation We look at transformation through a systemic perspective anchored in the experience that museums offer to visitors One facet of our exploration regards the museum experience itself as an instrument for change At this level we conceptualise what we mean by a transformative experience and look at design approaches specifically geared towards inducing transformation We then turn attention towards the way recent changes in the socio political and cultural context reverberated in structural and functional changes inside the museum and connected institutions and communities with shifting museum identities and new forms of cooperation emerging Finally we zoom in on the role of technology in the making of transformative museum experiences looking at opportunities and affordances but also calling for an ethical approach to integration of technology in museum practice

Artificial Intelligence and the Future of Human Relations Yanto Chandra,Ruiping Fan,2025-09-26 This book stimulates new conversations around the ethical and policy considerations stemming from the influence of artificial intelligence AI on human relationships within a cross cultural perspective With chapters from distinguished scholars from Eastern and Western backgrounds it delves into the fundamental aspects of human connections and good governance examining them through the perspectives of both Eastern and Western values while addressing the implications of AI While the recognition of AI s substantial challenges to human values and effective governance is widespread there exists a notable lack of focus on its impact on the essential human relationships that embody these values and encompass human identity within Eastern and Western traditions By centering attention on this aspect the book highlights a critical concern for the development of AI that is suitable for the future of human relationships and good governance Specifically the book seeks to examine the influence of AI on essential human relationships such as those between parent and child spouses the elderly and the young physician and patient as well as relations between friends citizens and nations It is an essential resource relevant to academics in philosophy applied ethics and bioethics AI ethics social and political philosophy

The Dark Side of Speech Carlo Penco,2024-10-08 What is disinformation and why does it matter How can we understand and detect different kinds of disinformation With an analysis of relevant events of the period 2012 2022 the book attempts to answer these questions The book is organized into four parts 1 The first part presents the notions of post truth and fake news using some of the most recent critical studies analyzing some typical examples and the environment in which some of them originated 2 The second part introduces the notion of conspiracy theory and describes the emergence of the idea of white supremacy and its ramifications together with the narratives developed during the COVID restrictions 3 The third part describes the emergence of the algorithms behind social networks and their role in propaganda making examples of US and European elections and the Brexit referendum An analysis of Cambridge Analytica shows the tip of an iceberg of disinformation that is spreading around the world Some remarks by comedians and philosophers help to give a new view on the concept of freedom of speech with particular attention to the more and more difficult freedom of the press 4 The fourth part gives some emergency tools

for detecting disinformation at an individual level understanding the most hidden mechanisms of disinformation and the biases that almost unavoidably enter our minds These tools come from the results both of traditional theories and the most recent social philosophy of language not despising references to statistics This is a fundamental book for having a general survey of this period of political turmoil consulting a wide list of references and official documents and having a grasp of the means of intellectual self defense This book is non standard it relies on the most sophisticated theories of language and yet it gives everything in simple and colloquial language Differently from sophisticated analyses of linguistic phenomena it gives the feeling of participating in a tour around what happened in the last decade with a disenchanted eye that uses some results of the critical literature without compelling one to become a theoretician in the field of philosophy or critical analysis The hidden focus of the book is freedom of speech and freedom of thought and what they mean today in an era of more sophisticated and widespread disinformation permitted by the algorithms governing social networks

Photography as Social Transformation Maciej Frackowiak, 2025-06-03 Photography as Social Transformation resituates the practices of photography within contemporary sociological thinking It examines how photography influences and shapes social order in the social media age and offers a methodological framework for studying transformation revealing the forms the process can take and the settings in which it occurs Photography and the transformation it effects is conceptualised using actor network theory allowing it to be effectively studied in the context of globalisation and the rapid spread of mobile devices Going beyond consideration of the images themselves Maciej Frackowiak analyses the rituals and devices used to take them the networks in which they circulate conversations about them and institutional attempts to regulate their content More than dead paper or a digital file or a visual representation Photography as Social Transformation shows how photography is a complex social phenomenon causal and capable of producing change Offering case studies from around the world and drawing on a range of sources giving priority to media coverage from specialised and popular venues Photography as Social Transformation is for students and scholars of the sociology of media visual sociology photographic methods in research media and communications cultural studies and photography theory

Superbloom Nicholas Carr, 2025-01-28 This book might finally convince you to stay off social media or at least get the apps off your phone Brianne Kane Scientific American A Financial Times Best Summer Book of 2025 in Technology From the author of The Shallows a bracing exploration of how social media has warped our sense of self and society From the telegraph and telephone in the 1800s to the internet and social media in our own day the public has welcomed new communication systems Whenever people gain more power to share information the assumption goes society prospers Superbloom tells a startlingly different story As communication becomes more mechanized and efficient it breeds confusion more than understanding strife more than harmony Media technologies all too often bring out the worst in us A celebrated commentator on the human consequences of technology Nicholas Carr reorients the conversation around modern communication challenging some of our most cherished beliefs

about self expression free speech and media democratization He reveals how messaging apps strip nuance from conversation how digital crowding erodes empathy and triggers aggression how online political debates narrow our minds and distort our perceptions and how advances in AI are further blurring the already hazy line between fantasy and reality Even as Carr shows how tech companies and their tools of connection have failed us he forces us to confront inconvenient truths about our own nature The human psyche it turns out is profoundly ill suited to the superbloom of information that technology has unleashed With rich psychological insights and vivid examples drawn from history and science Superbloom provides both a panoramic view of how media shapes society and an intimate examination of the fate of the self in a time of radical dislocation It may be too late to change the system Carr counsels but it s not too late to change ourselves
