Runaway College Costs James V. Koch, Richard J. Cebula, 2020-10-13 What role have governing boards played in tuition and fee escalation at four year public colleges and universities In the United States college costs especially tuition and fees have increased much more rapidly than either the overall Consumer Price Index or median household income This cost inflation has effectively closed the doors of higher education to many qualified students and contributed to a staggering 1.5 trillion in student debt Additionally the number of college enrollments in the United States actually declined for eight straight years between 2011 and 2019 as college student bodies became increasingly stratified on the basis of family incomes Virtually every public college cost increase however requires a positive vote from each university's governing board and the record shows that these votes are nearly always unanimous In Runaway College Costs James V Koch and Richard J Cebula argue that many trustees have forgotten that they should act as fiduciaries who represent the best interests of students

parents and taxpayers Instead Koch and Cebula explain too often many trustees prize size and more prestigious rankings over access and affordability These misplaced priorities make them vote in favor of ever more plush facilities expensive intercollegiate athletic programs administrative bloat and outdated models of instruction and research Koch and Cebula supply groundbreaking empirical evidence on the impact of governing board membership size and operations on tuition and fees They show for example that the existence of a powerful statewide governing board exercises significant downward pressure on tuition and fees and that state funding cuts cannot explain more than one half of the cost increases at the typical four year public institution The authors propose an action agenda for governing boards including changing the incentives placed in front of campus presidents and senior administrators Finally they conclude that although public university governing boards deserve blame for accelerating college cost inflation they also are ideally situated to improve the situation Runaway College Costs ends hopefully suggesting that governing boards and their member trustees actually have the greatest potential to improve the situation Providing the first rigorous empirical evidence of the impact that various modes of governance have had not only on tuition and fees but also on a half dozen measures of institutional performance this book will be of serious interest to governors legislators public university board members and their staffs those interested in supporting the traditional goals of public higher education and of course students and their parents as well as taxpayers

Like Nobody's Business Andrew C. Comrie, 2021-02-23 How do university finances really work From flagship public research universities to small private liberal arts colleges there are few aspects of these institutions associated with more confusion myths or lack of understanding than how they fund themselves and function in the business of higher education Using simple approachable explanations supported by clear illustrations this book takes the reader on an engaging and enlightening tour of how the money flows How does the university really pay for itself Why do tuition and fees rise so fast Why do universities lose money on research Do most donations go to athletics Grounded in hard data original analyses and the practical experience of a seasoned administrator this book provides refreshingly clear answers and comprehensive insights for anyone on or off campus who is interested in the business of the university how it earns its money how it spends it and how it all works Congressional Record United States. Congress, 1972 **Incentives and Test-Based**

Accountability in Education National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on Incentives and Test-Based Accountability in Public Education, 2011-11-18 In recent years there have been increasing efforts to use accountability systems based on large scale tests of students as a mechanism for improving student achievement The federal No Child Left Behind Act NCLB is a prominent example of such an effort but it is only the continuation of a steady trend toward greater test based accountability in education that has been going on for decades Over time such accountability systems included ever stronger incentives to motivate school administrators teachers and students to perform better Incentives and Test Based Accountability in Education reviews and synthesizes relevant

research from economics psychology education and related fields about how incentives work in educational accountability systems The book helps identify circumstances in which test based incentives may have a positive or a negative impact on student learning and offers recommendations for how to improve current test based accountability policies The most important directions for further research are also highlighted For the first time research and theory on incentives from the fields of economics psychology and educational measurement have all been pulled together and synthesized Incentives and Test Based Accountability in Education will inform people about the motivation of educators and students and inform policy discussions about NCLB and state accountability systems Education researchers K 12 school administrators and teachers as well as graduate students studying education policy and educational measurement will use this book to learn more about the motivation of educators and students Education policy makers at all levels of government will rely on this book to inform policy discussions about NCLB and state accountability systems
