Ehrenberg, 2009-07-01 America's colleges and universities are the best in the world They are also the most expensive Tuition has risen faster than the rate of inflation for the past thirty years There is no indication that this trend will abate Ronald G Ehrenberg explores the causes of this tuition inflation drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University Using incidents and examples from his own experience he discusses a wide range of topics including endowment policies admissions and financial aid policies the funding of research tenure and the end of mandatory retirement information technology libraries and distance learning student housing and intercollegiate athletics He shows that colleges and universities having multiple relatively independent constituencies suffer from ineffective central control of their costs And in a fascinating analysis of their response to the ratings published by magazines such as U S News World Report he shows how they engage in a dysfunctional competition for students In the short run colleges and universities have little need to worry about rising tuitions since the number of qualified students applying for entrance is rising even faster But in the long run it is not at all clear that the increases can be sustained Ehrenberg concludes by proposing a set of policies to slow the institutions rising tuitions without damaging their quality *College Admissions and Admissions Testing in a Time of Transformational Change* Kurt F. playing field How are the odds of attending and graduating from college stacked against low income youths and racial minorities What does the FBI Varsity Blues sting tell us about college admissions in America Book Features Provides 25 years of data on California showing how the correlation of test scores with race has grown over time while their predictive powers have declined Shows how the disparate results of SAT ACT scores by race provide grounds for a constitutional challenge to the use of those tests Provides an overview of our current national situation regarding college applications attendance and graduation rates according to family income and college major Offers a devastating critique of the College Board s adversity index Includes a national balance sheet on the experiences of test optional colleges **The College Buzz Book** Carolyn C. then measures the cost of remedial programs for underprepared high school students just to get them to where they should have been in the first place Toby also pulls no punches on the issue of grade inflation which rewards laziness while demoralizing hard working students In conclusion Toby proposes an innovative solution base financial aid solely on academic performance creating a compelling incentive for students to develop serious attitudes and study approaches in high school
