Film Discourse Interpretation

Janina Wildfeuer, 2014-06-03 This book contributes to the analysis of film from a multimodal and textual perspective by extending formal semantics into the realm of multimodal discourse analysis It accounts for both the inferential as well as intersemiotic meaning making processes in filmic discourse and therefore addresses one of the main questions that have been asked within film theory and multimodal analysis How do we understand film and multimodal texts The book offers an analytical answer to this question by providing a systematic tool for the description of this comprehension process It aims to advance knowledge of the various resources in filmic texts the ways the resources work together in constructing meaning and the ways people understand this meaning construction This new approach to film interpretation is thus able to remodel and improve the classical paradigm of film text analysis

Handbook of Engineering Systems Design Anja Maier, Josef Oehmen, Pieter E. Vermaas, 2022-07-30 This handbook charts the new engineering paradigm of engineering systems It brings together contributions from leading thinkers in the field and discusses the design management and enabling policy of engineering systems It contains explorations of core themes including technical and socio organisational complexity human

behaviour and uncertainty The text includes chapters on the education of future engineers the way in which interventions can be designed and presents a look to the future This book follows the emergence of engineering systems a new engineering paradigm that will help solve truly global challenges This global approach is characterised by complex sociotechnical systems that are now co dependent and highly integrated both functionally and technically as well as by a realisation that we all share the same climate natural resources a highly integrated economical system and a responsibility for global sustainability goals The new paradigm and approach requires the re designing of engineering systems that take into account the shifting dynamics of human behaviour the influence of global stakeholders and the need for system integration The text is a reference point for scholars engineers and policy leaders who are interested in broadening their current perspective on engineering systems design and in devising interventions to help shape societal futures
