Computational Intelligence in Urban Infrastructure Vinod Kumar Shukla, Piyush Maheshwari, Purushottam Sharma, Sonali Vyas, 2023-09-18 Computational Intelligence in Urban Infrastructure consolidates experiences and research results in computational intelligence and its applications in urban infrastructure It discusses various techniques and application areas of smart urban infrastructure including topics related to smart city management Major topics covered include smart home automation intelligent lighting smart human care services intelligent transportation systems ontologies in urban development domain and intelligent monitoring control and security of critical infrastructure systems supported by case studies Features

Covers application of AI and computational intelligence techniques in urban infrastructure planning Discusses characteristics and features of smart urban management Explores relationship between smart home and smart city management Deliberates various smart home techniques Includes different case studies for supporting and analyzing various aspects of smart urban infrastructure management This book is aimed at researchers graduate students libraries in communication networks urban and town planning and civil engineering

Human-Computer Interaction Constantine Stephanidis,Gavriel

Salvendy,2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with each other Human computer interaction HCI is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

Data Science and Internet of Things Giancarlo Fortino,Antonio Liotta,Raffaele Gravina,Alessandro

Longheu,2021-02-18 This book focuses on the combination of IoT and data science in particular how methods algorithms and tools from data science can effectively support IoT The authors show how data science methodologies techniques and tools can translate data into information enabling the effectiveness and usefulness of new services offered by IoT stakeholders The authors posit that if IoT is indeed the infrastructure of the future data structure is the key that can lead to a significant improvement of human life The book aims to present innovative IoT applications as well as ongoing research that exploit modern data science approaches Readers are offered issues and challenges in a cross disciplinary scenario that involves both IoT and data science fields The book features contributions from academics researchers and professionals from both fields

AI Advancements in Internet of Things, Smart Healthcare, and Intelligent Devices Khan, Muneer,Awasthi,

Shantanu,Sakib, Mohd,Khan, Mohd Vaseem,2025-10-16 The convergence of AI and the Internet of Things IoT is rapidly

transforming the landscape of intelligent devices As AI algorithms become more sophisticated and embedded in everyday objects devices are empowered to learn from data and operate with minimal human intervention This integration not only enhances operational efficiency and user experience but also paves the way for innovative applications across all sectors Exploring AI advancements in IoT reveals the transformative potential and emerging challenges of a future shaped by intelligent interconnected systems AI Advancements in Internet of Things Smart Healthcare and Intelligent Devices presents a comprehensive exploration of the powerful convergence between AI machine learning and IoT with a strong emphasis on their integration into intelligent devices It not only explores foundational concepts but also addresses the practical challenges and opportunities in deploying intelligent systems at scale Covering topics such as cloud computing predictive maintenance and software testing this book is an excellent resource for academicians researchers students engineers technologists policymakers and more
