Generative Artificial Intelligence and Ethics: Standards, Guidelines, and Best Practices Gaur, Loveleen, 2024-10-10 The rapid advancement of generative artificial intelligence AI has brought about significant ethical challenges As machines become more adept at creating human like content concerns about misuse bias privacy and accountability have emerged Without clear guidelines and regulations there is a risk of unethical use such as creating deepfake videos or disseminating misinformation which could have severe societal consequences Additionally questions about intellectual property rights and the ownership of AI generated creations still need to be solved further complicating the ethical landscape The book *Generative Artificial Intelligence and Ethics Standards Guidelines and Best Practices* comprehensively solves these ethical challenges By providing insights into the historical development and key milestones of Generative AI the book lays a foundation for understanding its complex ethical implications It examines existing ethical frameworks and proposes new ones tailored to AI s unique characteristics helping readers apply traditional ethics to AI development and deployment

Artificial Intelligence and Universal Values Jay Friedenberg, 2024-07-14 The field of value alignment or more broadly machine ethics is becoming increasingly important as artificial intelligence developments accelerate By alignment we mean giving a generally intelligent software system the capability to act in ways that are beneficial or at least minimally harmful to humans There are a large number of techniques that are being experimented with but this work often fails to specify what values exactly we should be aligning When making a decision an agent is supposed to maximize the expected utility of its value function Classically this has been referred to as happiness but this is just one of many things that people value In order to resolve this issue we need to determine a set of human values that represent humanity s interests Although this problem might seem intractable research shows that people of various cultures and religions actually share more in common than they realize In this book we review world religions moral philosophy and evolutionary psychology to elucidate a common set of shared values We then show how these values can be used to address the alignment problem and conclude with problems and goals for future research The key audience for this book will be researchers in the field of ethics and artificial intelligence who are interested in or working on this problem These people will come from various professions and include philosophers computer programmers and psychologists as the problem itself is multi disciplinary

Futuristic Dreams Michael Johnson, AI, 2025-02-26. *Futuristic Dreams* explores the profound impact of futuristic visions, particularly from science fiction, on both technological development and political ideologies. It posits that these imagined futures are not mere entertainment but actively shape our present. The book argues that science fiction has inspired real-world inventions while also serving as a cautionary voice, prompting ethical considerations related to technological innovation. The book examines how dystopian settings critique existing power structures and totalitarian regimes, while utopian ideals fuel social reform movements. Beginning with a historical overview of future-oriented narratives from utopian literature to cyberpunk, *Futuristic Dreams* progresses by dedicating chapters to specific themes. These include the use of dystopian settings, utopian ideals, and the development of technologies like artificial intelligence. The book then culminates by examining the practical implications of these insights for policymakers, technologists, and citizens alike. What makes this book unique is its interdisciplinary approach, combining literary criticism, political analysis, and technological forecasting to provide a holistic perspective. It strives for a clear and engaging style, making it accessible to a broad audience interested in the future of society and the role of imagination in shaping it.
