Music, Management, Marketing, and Law Phil Graham, 2019-03-25 This collection of interviews captures a period of historic change for the global music business along with a wealth of professional knowledge that extends from the late 1960s through to late 2012 when the interviews were conducted. They record the experiences and insights of people who helped to shape a global business that is quickly passing into history and transforming into something entirely new, often because of decisions the interviewees have been directly involved in making. The material includes the aesthetic, artistic, technical, commercial, legal, and strategic aspects of the music industry. What is said is timeless in its historical significance for the music business and in its relevance for researchers engaged in studies on the dynamics of change in the global commercial music landscape.

Privacy Is Hard and Seven Other Myths Jaap-Henk Hoepman, 2023-10-03 An expert on computer privacy and security shows how we can build privacy into the design of systems from the start. We are tethered to our devices all day every day, leaving data trails of our searches, posts, clicks, and communications. Meanwhile, governments and businesses collect our data and use it to monitor us without our knowledge. So we have resigned ourselves to the belief that privacy is hard, choosing to believe that websites do not share our information, for example, and declaring that we have nothing to hide anyway. In this informative and illuminating book, a computer privacy and security expert argues that privacy is not that hard if we build it into the design of systems from the start. Along the way, Jaap-Henk Hoepman debunks eight persistent myths surrounding computer privacy. The website that claims it doesn't collect personal data, for example, Hoepman explains that most data is personal, capturing location preferences and other information. You don't have anything to hide. There's nothing wrong with wanting to keep personal information even if it's not incriminating or embarrassing, private. Hoepman shows that just as technology can be used to invade our privacy, it can be used to protect it when we apply privacy by design. Hoepman suggests technical fixes, discussing pseudonyms, leaky design, encryption, metadata, and the benefits of keeping your data local.

[iTake-Over](#) David Arditi,2020-06-23 The second edition of iTake Over The Recording Industry in the Streaming Era sheds light on the way large corporations appropriate new technology to maintain their market dominance in a capitalist system To date scholars have erroneously argued that digital music has diminished the power of major record labels In iTake Over sociologist David Arditi suggests otherwise adopting a broader perspective on the entire issue by examining how the recording industry strengthened copyright laws for their private ends at the expense of the broader public good Arditi also challenges the dominant discourse on digital music distribution which assumes that the recording industry has a legitimate claim to profitability at the expense of a shared culture Arditi specifically surveys the actual material effects that digital distribution has had on the industry Most notable among these is how major record labels find themselves in a stronger

financial position today in the music industry than they were before the launch of Napster largely because of reduced production and distribution costs and the steady gain in digital music sales Moreover instead of merely trying to counteract the phenomenon of digital distribution the RIAA and the major record labels embraced and then altered the distribution system
