Pinterest Idea Ads vs. Instagram Stories, 2023-06-26 Social Media Marketing hat sich über die letzten Jahre zu einem festen und wichtigen Bestandteil der Werbemaßnahmen von Unternehmen und Werbetreibenden entwickelt Im Zuge dessen gewinnt auch das Konzept der bezahlten Partnerschaften mit sogenannten Content Creators zunehmend an Bedeutung In dieser Forschung wurde die Werbewirkung des in diesem Kontext als lukrativ geltenden Werbeformats

Instagram Stories mit der Werbewirkung des neuen Werbeformates Pinterest Idea Ads verglichen Innerhalb einer experimentellen Studie wurden entsprechend zwei Versuchsgruppen gebildet und die Werbewirkungseffekte der beiden Formate auf kognitiver affektiver und konativer Ebene untersucht Die vorliegende Untersuchung konnte auf den zu untersuchenden Werbewirkungsebenen in Summe keine signifikanten Unterschiede zwischen den beiden Versuchsgruppen nachweisen Bemerkenswert war jedoch dass die etwas schlechter abgeschnittene Pinterest Gruppe dennoch eine höhere Kaufneigung aufgewiesen hat Außerdem zeigten sich signifikante Unterschiede hinsichtlich der Nutzungszwecke und erwartungen der beiden Versuchsgruppen

The Inner Logout Rakesh Mishra, We live in an era where the boundaries between the physical and digital worlds have blurred to the point of near indistinction The smartphone in your pocket the laptop on your desk the smartwatch on your wrist these devices once heralded as tools of convenience have woven themselves into the fabric of our daily lives dictating how we work connect and even think This hyperconnected world while a marvel of human ingenuity has birthed what can only be described as a digital epidemic an insidious pervasive force that fragments our attention erodes our mental well being and distances us from our inner selves The statistics paint a stark picture As of 2025 the average person spends over 7 hours a day on screens with global internet users surpassing 5 billion Social media platforms streaming services and instant messaging apps compete relentlessly for our attention leveraging algorithms designed to keep us scrolling clicking and engaging The average smartphone user checks their device 150 times a day often without conscious intent driven by a dopamine fueled cycle of notifications and instant gratification This constant connectivity has transformed how we interact with the world but at what cost The digital epidemic is not just about time spent online it's about the psychological and emotional toll it exacts Studies show a sharp rise in anxiety depression and sleep disorders correlated with excessive screen time The constant barrage of notifications emails likes retweets breaking news creates a state of perpetual alertness leaving our nervous systems in a chronic state of fight or flight The prefrontal cortex responsible for focus and decision making is overwhelmed by the sheer volume of information we process daily leading to what psychologists call cognitive overload This overload manifests as mental fog reduced productivity and a pervasive sense of being always on yet never fully present

Living with Algorithms Ignacio Siles, 2023-04-25 A nuanced account from a user perspective of what it's like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In Living with Algorithms Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted

them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us Living with Algorithms clarifies the debate over the future of datafication and whether we have a say in its development Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies

FAKES vs REALITY J.G. Matuszek, 2025-10-31 Why Fakes Are More Than Just False News Fakes are no longer just crude falsehoods circulating in the digital space They have evolved into complex tools of manipulation subtle emotionally charged and ideologically loaded Their forms are diverse fake news deepfakes manipulated studies fake profiles political propaganda distorted statistics or artificially generated opinions by bots Despite their differences they all share a common goal to sow confusion undermine trust and influence power structures In a world where information circulates globally the distinction between knowledge and understanding has become a matter of survival Knowledge alone is not enough it must be contextualized reflected upon and questioned Understanding means recognizing connections uncovering motives and interpreting narratives Anyone who reduces fakes to simple factual errors underestimates their true impact They do not merely operate at the level of information but infiltrate deep into emotional and societal frameworks
