The book culminates by considering the future of social media in a TikTok-dominated world and offers insights into its potential evolution. The arguments are supported by a variety of evidence, including platform data, social media analytics, academic research from sociology, communication studies, and computer science, and original interviews with TikTok users and content creators. The book also draws from internal company documents and industry reports to paint a comprehensive picture of the platform's operations. TikTok Revolution connects to several interdisciplinary fields. Firstly, it intersects with media studies by offering a contemporary case study of how new media technologies shape content creation and consumption. Secondly, it connects to sociology through its exploration of youth culture, identity formation, and social trends within the digital landscape. Finally, it is relevant to the field of computer science through its analysis of algorithms, artificial intelligence, and personalized recommendation systems. The writing style is accessible, avoiding jargon and technical terms where possible while maintaining academic rigor. The target audience comprises students, educators, researchers, policymakers, and anyone interested in understanding the cultural, social, and technological implications of social media.
