Systeme im Wandel Lukas Mitterauer, Philipp Pohlenz, Susan Harris-Huermann, 2019
Die Idee der Universität hat sich ebenso wie Universitäten und Hochschulen als Institutionen über die Jahrhunderte als äußerst erfolgreich und widerstandsfähig gegen Systemirritationen erwiesen.

Nichtsdestotrotz haben die Veränderungen der letzten drei Jahrzehnte insbesondere der Bologna Prozess und die Umstellung auf Steuerungsmodelle im Sinne des wettbewerbsorientierten New Public Management Spuren hinterlassen. In der jüngsten Zeit sind weitere Diskurse hinzugekommen wie etwa die Frage nach der Bewältigung steigender studentischer Heterogenität, eine stärker internationale Ausrichtung, die Nutzung digitaler Lehr-Lernmedien sowie die Erweiterung des Aufgabenspektrums von Hochschullehre im Kontext sich verändernder gesellschaftlicher Qualifikationserwartungen. Im Rahmen der Frühjahrstagung 2018 des Arbeitskreises Hochschulen in der Gesellschaft für Evaluation DeGEval an der FOM in Essen wurde erörtert, wie sich Qualitätsmanagementsysteme angesichts dieser vielfältigen Herausforderungen weiterentwickeln müssen.  Sun, Benjamin Baez, 2010-04-22 This monograph pays special attention to the intellectual property of copyrights and patents It
 examines how legal parameters competing interests and technological advances take shape in economic political and social
 contexts that require colleges and universities make intellectual property central to their operations Economic political and
 social forces are redefining knowledge as property that can be owned and institutions of higher education as producers of
 knowledge are central participants of this phenomenon Debates about intellectual property are rampant some arguing that
 knowledge should not become a commodity for exchange others than intellectual property fosters innovation in society What is
 not debatable is the importance of the law for resolving disputes about intellectual property Today the evolving legal context
 association with intellectual property and technological advancements have created competing interests and demands from
 individuals institutions and even nation The law is often the realm in which these interests and disputes take place with more
 or less satisfying results Colleges and universities must grapple with not only complex legal issues but also the philosophical
 and political consequences associated with the conversation of intellectual acts into property This is the fourth issue in the
 34th volume of the Jossey-Bass series ASHE Higher Education Report Each monograph in the series is the definitive analysis

of a tough higher education problem based on thorough research of pertinent literature and institutional experiences. Topics are identified by a national survey. Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication.

The Price of Everything Eduardo Porter, 2011-01-06 Why is a life saved from a terrorist attack felt to be worth two saved from a natural disaster? Why are men more valuable than women? Why do Americans tip when Europeans don't? And how can orange juice be used to predict the weather? The Price of Everything starts with a simple idea: behind every decision we make lies a price, whether that's buying a cup of coffee, taking a new job, or deciding to become a parent. Prices are the invisible thread that connect and explain our society, our economy, our culture, our mistakes, and our successes. Revealing connections that are ingenious and unexpected, Eduardo Porter shows just how fundamental the price of things work. Happiness, faith, family, and the future are both to our everyday behaviour and to civilisation as we know it.

The Enlightened College Applicant Andrew Belasco, Dave Bergman, 2023-05-15 Deluged with messages that range from 'It's Ivy League or bust' to 'It doesn't matter where you go', college applicants and their families often find themselves lost adrift in a sea of information overload. Finally, a worthy life preserver has arrived. The Enlightened College Applicant speaks to its audience in a highly accessible, engaging, and example-filled style, giving readers the perspective and practical tools to select and earn admission at the colleges that most closely align with their academic career and life goals. In place of the recycled entrance statistics or anecdotal generalizations about campus life found in many guidebooks, The Enlightened College Applicant presents a no-nonsense account of how students should approach the college search and admissions process. Shifting the mindset from 'How can I get into a college?' to 'What can that college do for me?', authors Bergman and Belasco pull back the curtain on critical topics such as whether college prestige matters, what college-related skills are valued in the job market, which schools and degrees provide the best return on investment, how to minimize the costs of a college education, and much more. Whether you are a valedictorian or a B/C student, this easy-to-read book will improve your college savvy and enable you to maximize the benefits of your higher education.
