**Warranty and Preventive Maintenance for Remanufactured Products** Ammar Y. Alqahtani, Surendra M. Gupta, 2018-12-12 The exponential increase in the development of technology coupled with the customers immense desire to possess the newest technological products makes for truncated product lifespans which instigates a substantial upsurge in their rate of disposal Attempts have been made to establish specialized product recovery facilities with the intention of diminishing the volume of accumulated waste delivered to landfills using product recovery procedure such as remanufacturing The economic benefits produced by remanufacturing also portray the role of product recovery in a more attractive light The quality of a remanufactured product is uncertain for some consumers Therefore these consumers possess insecurities in deciding whether or not the remanufactured products will render the same expected performance This ambiguity regarding a remanufactured product could possibly result in the consumer deciding against its purchase With such consumer apprehension remanufacturers often seek market mechanisms that provide reassurance as to the stable durability that these products still maintain One strategy that the remanufacturers often use is the utilization of the premise of offering product warranties with preventive maintenance on their products This book is concerned with the practice and theory of warranty management and preventive maintenance particularly in relation to remanufactured products warranties Models developed in this book can be used for making the right decisions in offering renewable nonrenewable one and two dimensional warranty policies and for managerial decision in considering maintenance contracts or outsourcing maintenance for remanufactured components and products Features Discusses a variety of warranty policies and preventive maintenance of remanufactured products first book to do so Presents mathematical models and applications for warranty policies using examples and simulation results Considers cost and optimization problems from the remanufacturer s and buyer s points of views Provides a foundation for academicians interested in building models in the area of warranty and preventive maintenance analysis of remanufactured products Offers the essential methodology needed by practitioners involved with warranty and preventive maintenance analysis along with extensive references for further research **Building an Adapted Business Law** Sónia de Carvalho, Anton PETRIČEVIĆ, 2022-02-10 This volume contains the scientific papers presented at the Eleventh International Conference Perspectives of Business Law in the Third Millennium that was held on 19 November 2021 in online format on Zoom The conference is organized each year by the Faculty of Law of the Bucharest University of Economic Studies together with the Society of Juridical and Administrative Sciences The scientific studies included in this volume are grouped into five chapters Stop or go back to business as unusual legal issues impacting businesses during this time Changes in the legal landscape regulatory challenges and more In depth look at business law topics European overview of the legal and business considerations The present volume is addressed to practitioners researchers students and PhD candidates in juridical sciences who are interested in recent developments and prospects for

development in the field of business law at international and national level *Science and Technology in International Economic Law* Bryan Mercurio, Kuei-Jung Ni, 2013-12-13 Science and technology plays an increasingly important role in the continued development of international economic law This book brings together well known and rising scholars to explore the status and interaction of science technology and international economic law The book reviews the place of science and technology in the development of international economic law with a view to ensure a balance between the promotion of trade and investment liberalisation and decision making based on a sound scientific process without hampering technological development The book features chapters from a range of experts including Lukasz Gruszczynski J rgen Kurtz Andrew Mitchell and Peter K Yu who examine a wide range of issues such as investment law international trade law and international intellectual property By bringing together these issues the book asks how international trade and investment regimes utilise science and technology and whether they do so fairly and in the interest of broader public policies This book will be of great interest to researchers of international economic law health law technology law and international intellectual property law

Science & Technology Review ,2016 **The Zinc and Iodine Book** Stephen DeMeo, 2019-05-15 This book is for chemistry teachers who are thinking about reinventing their laboratory experiments that they provide to their students More than a collection of experiments it is an example of using a chemical theme to teach chemistry Instead of introducing many different chemicals per experiment as is the norm in most lab manuals this novel resource focuses on two commonly found elements Zinc and Iodine So what is so special about these elements At the heart of this resource is a colorful cyclic reaction between zinc and iodine one that produces a compound that can decompose back to its original elements This unique phenomenon demonstrates that matter not only changes but is also conserved through a chemical reaction Knowing that a compound can be the same but different than the reactants that formed it is to understand the essence of chemical change Complementing this reaction this book contains experimental activities that utilize the zinc and iodine theme to scaffold new concepts such as the properties of matter solid and gas stoichiometry equilibrium kinetics acid base chemistry and electrochemistry This teacher tested resource focuses on a set of safe substances that are appropriate for high school teachers who provide an advanced chemistry placement course and for college instructors teaching a first year chemistry laboratory sequence
