Dear Hiring Manager,

This role feels like a perfect match for my experience in advertising creatives, and I'm excited about the chance to bring that to PixelHaus.

I'm a creative assistant with 4 years of experience at advertising agencies, with a focus on B2C eCommerce. I've done creatives of all types, but my strength is in designing social media assets that drive conversions.

My experience with Adobe Suite, especially Illustrator, has been the most impactful. At Nova, I used it daily when working with the marketing department in delivering creatives. This meant keeping up with brand guidelines and deadlines. It taught me how to manage my time and work efficiently under pressure.

I also built up copywriting skills. At Draper, I used it during a conversion campaign for their men's suit line. Around that time, the team was short-staffed, and I stepped in to manage the full ad process. It gave me a broader understanding of the entire ad process, from concept to execution.

That's why I'm excited about this role, it feels like a natural next step where I can bring my strengths in ad creatives to a team that values versatility.

Thank you for considering my application. I'd love the chance to walk you through how I can support your team's goals. I'm available to talk at your convenience and hope we can connect soon.

Best Regards,

Peggy Olsen

and Education 8OSME held on 16-18 July 2024 at Swinburne University of Technology in Melbourne Australia. The papers represent current work in different disciplines of origami and they are grouped into four subject themes: Volume 1 Engineering I, Volume 2 Engineering II, Volume 3 Mathematics, Computation, History and Mental Health, and Volume 4 Design and Education. We witness increasing interests in origami from researchers, practitioners, and artists. Of a special note is the rapidly growing research in origami engineering, a distinctive field with fundamental concepts and applications related to space, mechanical, material, medical, and structural engineering etc. Participants of 8OSME should find great passion and opportunity of collaborations across disciplines of origami. We hope these four volumes will inspire not just currently active researchers and artists but also the next generation of origami scientists, mathematicians, engineers, designers, historians, and teachers.

Wagner and the Creation of the Ring Michael Downes, 2025-07-01. Part cultural history, part biography, this is the fascinating story of Richard Wagner's life, influences, gift for storytelling, and artistic revolution culminating in the dramatic journey to write *The Ring Cycle*. *The Ring Cycle* is one of the most epic and compelling operas of the nineteenth century, created by a composer who was alongside Dickens, Tolstoy, and Victor Hugo, also one of the century's master storytellers. But the story of how Richard Wagner created the work is one full of intrigue and triumphs against unlikely odds, as well as controversy due to the composer's anti-semitic views and popularity with the Nazi party. In *Wagner and the Creation of the Ring*, Michael Downes combines cultural history and biography to recount the colorful, fascinating, and insightful journey behind the creation of *The Ring* and its mythology. He tells the story of how and why this extraordinary masterpiece came into being, why it takes the form it does, why it fascinates and obsesses so many, and horrifies others, and why it still matters today.

Electrical Installation Record, 1918 **Smart Cities to Smart Societies** Esmat Zaidan, Imad Antoine Ibrahim, Elie Azar, 2025-05-28. This book explores the governance of smart cities from a holistic approach, arguing that the creation of smart cities must consider the specific circumstances of each country to improve the preservation, revitalisation, liveability, and sustainability of urban areas. The recent push for smart cities is part of an effort to reshape urban development through megaprojects, centralised master planning, and approaches that convey modernism and global affluence. However, moving towards a citywide smart transition is a major undertaking, and complexities are expected to grow exponentially. This book argues that a comprehensive approach is necessary to consider all relevant aspects. The

chapters seek to identify the potential and pitfalls of the smart transformation of urban communities and its role in sustainability goals share state of the art practices concerning technology policy and social science dimensions in smart cities and communities and develop opportunities for cooperation and partnership in wider and larger research and development programmes Divided into three parts the first part of the book highlights the significance of various societal elements and factors in facilitating a successful smart transition with a particular emphasis on the role of human capital The second part delves into the challenges associated with technology and its integration into smart city initiatives The final part of the book examines the current state of regulations and policies governing smart cities The book will be an important asset for students and researchers studying law engineering political science international relations geopolitics economics and engineering
