Electronic commerce EC describes the manner in which transactions take place over electronic networks mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications such as buying and selling stocks and airline tickets online are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn, and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China, where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries, e.g., the shared economy models of Uber and Airbnb. The 2018 9th edition brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations, and mobility.

Digital Age Consumers and Brands Purnima Embranthiri, 2025-02-28. Digital Age Consumers and Brands explores consumer and branding behavior in the digital age. Previously, shopping required meticulous planning and interacting with salespeople for product information. Technology has revolutionized these processes, making shopping more convenient. Today, people can browse and buy items from the comfort of their seats, with 81% of shoppers using search engines before making a purchase. Online reviews and testimonials have replaced traditional word-of-mouth marketing, significantly influencing buyer decisions. Businesses have adapted by setting up e-commerce websites and listing products in marketplaces to retain customers. This book examines how the internet has transformed consumer engagement with brands, reshaping marketing economics and making many traditional strategies obsolete. For marketers, the old ways of doing business are unsustainable. We highlight the importance of sound marketing practices, excellent customer service, and stellar products and services for business success. Understanding buyers and learning how they think are crucial elements for success in today's market.

The Corporation of the Future Stuart Orr, Paul Hunter, 2022-11-24. Although largely unseen, the industrial revolution taking place before us is picking up steam dramatically. Dissolution of traditional global trading partnerships, the effect of COVID-19 on supply chains, and the formation of new trading blocks such as China's Belt and Road initiatives are creating turmoil and rapid change in the international business domain. Continual advances in technology, health treatments, political, and societal change are underpinning these transformations. It is unclear just how this revolution will unfold or what the role of the corporation will be in the long run. This book helps us navigate through these challenging times by identifying areas where opportunities will develop. Written by highly qualified experts from a diverse range of backgrounds, the book takes a novel backcast view to present more critical arguments. The book has been set in the not-so-distant future, reflecting back on the changes that have
