different product categories which are subsequently assessed and coded The researcher then conducts a regression analysis as this allows to evaluate the influence of the traditional visual design stimuli on the consumer s engagement rate Whereas novel cognitive demanding stimuli are not found to influence the engagement rate for a brand post certain physically intensive prominent stimuli as well as some affective emotional stimuli have a significant influence The present study further investigates the moderating effect of brand knowledge on the magnitude of the stimuli s influence on consumer engagement rate The results indicate that brand knowledge has a moderating effect on certain stimuli For all other stimuli the influence on the engagement rate does not change for different levels of brand knowledge The results further show that design stimuli applied in brand posts on Instagram differ in their impact on the engagement rate depending on the product category shown in the brand post These findings can be used by managers to exploit the benefits of social media marketing on Instagram

Und das nicht ohne Grund: Günstige Produktionskosten, interaktive Möglichkeiten, Globalität und zeitunabhängige Kommunikation sind nur einige Faktoren, die für eine online ausgerichtete Kommunikation sprechen. Hierfür steht eine Vielzahl an Plattformen wie Facebook, Twitter, YouTube, Pinterest oder LinkedIn zur Verfügung. Ein Dienst, der sich in den letzten Jahren großer Beliebtheit erfreut hat, ist die Foto-Plattform Instagram. Viele Unternehmen folgen bereits dem Hype um Instagram und sind hier vertreten. Allein im Jahr 2017 wurden innerhalb von nur sechs Monaten 17 Millionen Instagram Businessprofile neu angelegt. Damit verzeichnet Instagram 25 Millionen Unternehmensprofile weltweit. Auch auf der Nutzerseite ist ein Anstieg zu verzeichnen. Laut Statistiken folgen circa 80 Prozent der Nutzer einem Unternehmen auf Instagram. Doch wieso ist dies so?

Social Sensing and Big Data

Computing for Disaster Management Zhenlong Li, Qunying Huang, Christopher T. Emrich, 2020-12-17 Social Sensing and Big Data Computing for Disaster Management captures recent advancements in leveraging social sensing and big data computing for supporting disaster management. Specifically analysed within this book are some of the promises and pitfalls of social sensing data for disaster relevant information extraction, impact area assessment, population mapping, occurrence patterns, geographical disparities in social media use and inclusion in larger decision support systems. Traditional data collection methods such as remote sensing and field surveying often fail to offer timely information during or immediately following disaster events. Social sensing enables all citizens to become part of a large sensor network which is low cost, more comprehensive and always broadcasting situational awareness information. However, data collected with social sensing is often massive, heterogeneous, noisy and unreliable in some aspects. It comes in continuous streams and often lacks geospatial reference information. Together, these issues represent a grand challenge toward fully leveraging social sensing for emergency management decision making under extreme duress. Meanwhile, big data computing methods and technologies such as high performance computing, deep learning and multi source data fusion become critical components of using social sensing to understand the impact of and response to the disaster events in a timely fashion. This book was originally published as a special issue of the International Journal of Digital Earth.
