Michigan Ensian , **Research Handbook on University Rankings** Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact *Global University Rankings and the Politics of Knowledge* Michelle Stack, 2021-06-17 For many institutions to ignore your university's ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact Conceptually unique in its scope *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice *Rankings and the Reshaping of Higher Education* Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

World University Rankings: Statistical Issues And Possible Remedies Kay Cheng Soh, 2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum to process the indicator data Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years

uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy **Game On** Susan F. Paterno,2021-06-15 Director of the Chapman journalism program and mother of four recent college grads Susan F Paterno leads you through the admissions process to help you and your family make the best decision possible How is it possible that Harvard is more affordable for most American families than their local state university Or that up to half of eligible students receive no financial aid Or that public universities are rejecting homegrown middle and working class applicants and instead enrolling wealthy out of state students College admission has escalated into a high stakes game of emotional and financial survival How is the deck stacked against you And what can you do about it Susan F Paterno a veteran academic and journalist answers these questions and more in *Game On* Paterno helped her four very different kids navigate the application process to a wide range of colleges paying for their four year educations on a finite budget She incisively decodes the college admission industry the consultants the tutors the rankers the branding companies hawking advantage and arms you with the knowledge you need to make the system work for you You ll learn how to narrow your focus analyze who gets in and why and look for the right financial fit before considering anything else including geography reputation and especially ranking Among the tools and insights in *Game On* Why forty years of failed free market policies have led to skyrocketing tuition and historic levels of student debt Why applying to college has become a bewildering maze and how to find your way to a successful result Why college costs are more terrifying than you think How to read beyond the rack rate to negotiate the best financial package with the least debt Why merit is a myth but merit aid is essential The difference between family debt and student debt and how to split it A playbook for the Hunger Games of higher education *Game On* explains the anxiety uncertainty and chaos in college admission explodes the myth of meritocracy exposes the academy s connection to America s widening gap between rich and poor and provides strategies to beat and reform a broken system *Global University Rankings and the Mediatization of Higher Education* Michelle Stack,2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly

competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy

Dream School Jeffrey Selingo, 2025-09-09 New York Times Bestseller From the bestselling author of Who Gets In and Why a must have playbook for families coping with a more stressful era of startling low admission rates and sky high prices one that widens the aperture beyond the Top 25 schools and connects students parents and counselors with quality affordable choices Attending college has long been a rite of passage for millions of teens and a bedrock of the American dream But that well worn path has lately taken a wrong turn denying admission even to super achievers and putting intolerable stress on family finances Now in Dream School Jeffrey Selingo shifts the spotlight from how colleges pick students to how students can better pick colleges With test optional policies and grade inflation leveling the playing field for applicants getting into prestigious schools has become a kind of lottery Plan A may work out but increasingly it isn't so Selingo urges families to ditch the Top 25 or bust mindset and look beyond the usual suspects Hidden gem schools with incredible value and rich opportunities are waiting to be discovered Backed by unparalleled research and an eye opening survey of more than 3 000 parents Dream School reveals what really matters in a college strong job prospects after graduation hands on learning experiences and a sense of belonging To help students find their perfect match Selingo highlights 75 accessible and affordable colleges that will satisfy those priorities Organized into three easy to digest sections Dream School explains why elite college degrees turn out to matter less than you think why many parents and students are choosing value over prestige and how to make sure the degree really pays off In these pages Selingo's engaging style and expert insights turn what is often an unnavigable maze into a clear roadmap Destined to become the ultimate guide for families crossing the perilous college admissions landscape Dream School isn't just a book it's a lifeline for those who can find themselves trapped in an overwhelming process

Influence of University Rankings on Institutions: Ethics, Controversies, and Competition Kayyali, Mustafa, 2025-10-16 The influence of university rankings on higher education institutions reveals ethical concerns controversies and increased global competition As rankings become a measure of academic prestige many universities align their strategies with ranking criteria sometimes at the expense of educational values This pursuit of higher rankings often drives institutions to invest in research output and international visibility while potentially neglecting teaching quality or community engagement Criticisms emerge over the transparency and fairness of ranking methodologies raising questions about their validity and the consequences they produce Further exploration into the ethical implications of rankings may reveal new contentious practices and competitive dynamics shaped by the prioritization of university rankings Influence of University Rankings on Institutions Ethics Controversies and Competition explores how the pursuit of higher university rankings influences institutional priorities behaviors and decision making processes It

examines the ethical dilemmas methodological controversies and competitive pressures that arise from global ranking systems This book covers topics such as mental health teacher education and ethics and bias and is a useful resource for educators policymakers government officials psychologists academicians researchers and scientists **University**

Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties
