Ehrenberg, 2009-07-01 America's colleges and universities are the best in the world They are also the most expensive Tuition has risen faster than the rate of inflation for the past thirty years There is no indication that this trend will abate Ronald G Ehrenberg explores the causes of this tuition inflation drawing on his many years as a teacher and researcher of the economics of higher education and as a senior administrator at Cornell University Using incidents and examples from his own experience he discusses a wide range of topics including endowment policies admissions and financial aid policies the funding of research tenure and the end of mandatory retirement information technology libraries and distance learning student housing and intercollegiate athletics He shows that colleges and universities having multiple relatively independent constituencies suffer from ineffective central control of their costs And in a fascinating analysis of their response to the ratings published by magazines such as U S News World Report he shows how they engage in a dysfunctional competition for students In the short run colleges and universities have little need to worry about rising tuitions since the number of qualified students applying for entrance is rising even faster But in the long run it is not at all clear that the increases can be sustained Ehrenberg concludes by proposing a set of policies to slow the institutions rising tuitions without damaging their quality *College Admissions and Admissions Testing in a Time of Transformational Change* Kurt F. Geisinger, 2022-12-30 Perhaps no topic in higher education is more controversial than admissions whether it be to a prestigious college graduate schools or professional schools In response to the pandemic and a host of race relations issues in the country many colleges and universities have changed their policies regarding admissions testing In this foundational volume renowned chapter authors address a diverse set of themes related to college admissions examining new perspectives exploring the strengths and weaknesses of current practices and discussing how institutions might use different techniques to attract diverse students particularly those who have not traditionally attended college Experts in college admission testing admissions

Soares, 2020-02-14 This update to *SAT Wars* provides new evidence in the case against standardized college entry tests including the experiences of test optional colleges *The Scandal of Standardized Tests* sheds significant light on key problems such as Are the tests stronger proxies for race and family income today than they were 20 years ago Does going test optional promote racial and economic diversity Are there any differences in academic records between students admitted without test scores and those with them How does testing figure into race sensitive admissions legal controversies Why is the College Board's environmental dashboard inadequate as a way to create a fair

playing field How are the odds of attending and graduating from college stacked against low income youths and racial minorities What does the FBI Varsity Blues sting tell us about college admissions in America Book Features Provides 25 years of data on California showing how the correlation of test scores with race has grown over time while their predictive powers have declined Shows how the disparate results of SAT ACT scores by race provide grounds for a constitutional challenge to the use of those tests Provides an overview of our current national situation regarding college applications attendance and graduation rates according to family income and college major Offers a devastating critique of the College Board s adversity index Includes a national balance sheet on the experiences of test optional colleges **The College Buzz Book** Carolyn C. Wise,Stephanie Hauser,2007-03-26 Many guides claim to offer an insider view of top undergraduate programs but no publisher understands insider information like Vault and none of these guides provides the rich detail that Vault s new guide does Vault publishes the entire surveys of current students and alumni at more than 300 top undergraduate institutions Each 2 to 3 page entry is composed almost entirely of insider comments from students and alumni Through these narratives Vault provides applicants with detailed balanced perspectives Historic Newspapers in the Digital Age Paul Gooding,2016-12-08 In recent years cultural institutions and commercial providers have created extensive digitised newspaper collections This book asks the timely question what can the large scale digitisation of newspapers tell us about the wider cultural phenomenon of mass digitisation The unique form and materiality of newspapers and their grounding in a particular time and place provide challenges for researchers and digital resource creators alike At the same time the wider context in which digitisation of cultural heritage occurs shapes the impact of digital resources in ways which fall short of the grand ambitions of the wider theoretical discourse Drawing on case studies from leading digitised newspaper collections the book aims to provide a bridge between the theory and practice of how these digitised collections are being used Beginning with an exploration of the hyperbolic nature of technological discourses the author explores how web interfaces funding models and the realities of contemporary user behaviour contrast with the hyperbolic discourse surrounding mass digitisation This book will be of particular interest to those who want to investigate how user studies can inform our understanding of technological phenomena including digital resource creators information professionals students and researchers in universities libraries museums and archives **The Lowering of Higher Education in America** Jackson Toby,2009-11-12 A top educator looks at the causes and national costs of the lowering of college admission and academic standards in the United States then proposes confronting the problem by tying federal student grants and loans to academic performance as well as to financial need After a half century of teaching distinguished educator Jackson Toby concludes that all too often our current system gives high school students the impression that college is an entitlement and not a challenge The Lowering of Higher Education Why Financial Aid Should be Based on Student Performance is Toby s unflinching look at this broken system and the ways it can be fixed The Lowering of Higher Education documents just how far college admission standards have fallen

then measures the cost of remedial programs for underprepared high school students just to get them to where they should have been in the first place Toby also pulls no punches on the issue of grade inflation which rewards laziness while demoralizing hard working students In conclusion Toby proposes an innovative solution base financial aid solely on academic performance creating a compelling incentive for students to develop serious attitudes and study approaches in high school
