 nished with the following mission statement on the Future Direction on Computers for Handicapped Persons The different themes
 show that a lot of problems are solved by the usage of computer technology for helping handicapped persons for instance for

 the next years One direction is obvious The tools must be improved and research and development work should be extended
 to all groups of handicapped even if they are numerically not so large as for instance the blind or visually handicapped persons
 On the other side in the area of social implications there is an increasing demand on social science studies on overall computer
 use among disabled persons Because sources are in principle missing today about disabled persons work tasks research in
 this field must begin by trying to survey this aspect Particular attention should be paid to the extent and character of
 computer use among the handicapped in work life There are a lot of questions which should be answered during the next
 years for reaching the aim of rehabilitation Fifteen years later the 9th International Conference on Computers Helping
 People with Special Needs Paris 2004 offered a comprehensive and deepened view on general awareness special research and
