*The Bubble Economy* Robert U. Ayres, 2014-05-30 Why the global economy has become increasingly unstable and how financial de carbonization could break the pattern of bubble driven wealth destruction The global economy has become increasingly perhaps chronically unstable Since 2008 we have heard about the housing bubble subprime mortgages banks too big to fail financial regulation or the lack of it and the European debt crisis Wall Street has discovered that it is more profitable to make money from other people s money than by investing in the real economy which has limited access to capital resulting in slow growth and rising inequality What we haven t heard much about is the role of natural resources energy in particular as drivers of economic growth or the connection of global warming to the economic crisis In *The Bubble Economy* Robert Ayres an economist and physicist connects economic instability to the economics of energy Ayres describes among other things the roots of our bubble economy including the divergent influences of Senator Carter Glass of the Glass Steagall Law and Ayn Rand the role of energy in the economy from the oil shocks of 1971 and 1981 through the Iraq wars the early history of bubbles and busts the end of Glass Steagall climate change and the failures of austerity Finally Ayres offers a new approach to trigger economic growth The rising price of fossil fuels notwithstanding fracking suggests that renewable energy will become increasingly profitable Ayres argues that government should redirect private savings and global finance away from home ownership and toward de carbonization investment in renewables and efficiency Large scale investment in sustainability will achieve a trifecta lowering greenhouse gas emissions stimulating innovation based economic growth and employment and offering long term investment opportunities that do not depend on risky gambling strategies with derivatives

**Mechanix Illustrated**, 1979 *Financing patterns of European Buy-Outs* Sascha Kaumann, 2009-01-12 Inhaltsangabe Introduction The 1980 s saw the creation of a new form of corporate takeover Leveraged Buy Outs Extensively discussed they led to a widespread public debate on corporate governance in the US that culminated in a 1989 congressional hearing on the possible implications of

leveraged Buy Outs for the economy The public picture was clear The Barbarians at the Gate travelled in pin striped suits knocking on executives doors while asking for their seat in the corporate boardroom Actions such as paying for acquisitions with borrowed money cutting jobs stealing tax money from the state through increased leverage and selling the firms after a couple of years for a huge profit all contributed to the image of LBO financiers as corporate raiders Not only within the public spectre but moreover economic literature seriously criticised the one off gains and zero sum sources of value associated with leveraged Buy Outs Summers labels the private benefit of LBO shareholders as being achieved at the expense of other stakeholder groups misvaluations and future growth opportunities Despite this advocates of this new form of organisation were to be found Not only did investors searching for higher returns in a low interest environment welcome the advent of the LBO asset class but moreover literature began to develop awareness of the benefits of those transactions The solution to acute incentive problems found in public corporations which this new form of takeover was able to offer led Jensen to remark The last share of publicly traded common stock will be sold in 2003 Knowledge of this new acquisition technique quickly began to reach Europe and by 1989 the total value of Buy Out transactions undertaken reached bn 6.5 in the old continent a 70% year on year increase from 1981 After a fall in Buy Out activity in the late 1990 s transactions have recently increased with prominent examples in 2003 including the bn 1.05 takeover of BertelsmannSpringer the science and business media publishing unit of Bertelsmann by UK financial sponsors Cinven and Candover and the bn 5.7 takeover of Seat PagineGialle by a consortium of BC Partners CVC Capital Partners Investitori Associati and Permira Europe s biggest Buy Out in 2003 Of particular interest to both the academic and financial communities is the aspect of their financing structure Why are LBOs financed with so much debt How are the complicated financing structures

The Economic History in Song, Liao, Jin and Xixia Dynasty Li Shi, The book is the volume of The Economic History in Song Liao Jin and Xixia Dynasty among a series of books of Deep into China Histories The earliest known written records of the history of China date from as early as 1250 BC from the Shang dynasty c 1600 1046 BC and the Bamboo Annals 296 BC describe a Xia dynasty c 2070 1600 BC before the Shang but no writing is known from the period The Shang ruled in the Yellow River valley which is commonly held to be the cradle of Chinese civilization However Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River These Yellow River and Yangtze civilizations arose millennia before the Shang With thousands of years of continuous history China is one of the world s oldest civilizations and is regarded as one of the cradles of civilization The Zhou dynasty 1046 256 BC supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period These states became independent and warred with one another in the following Warring States period Much of traditional Chinese culture literature and philosophy first developed during those troubled times In 221 BC Qin Shi Huang conquered the various

warring states and created for himself the title of Huangdi or emperor of the Qin marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China. In some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.
