The Female Teacher on Television Andrew

L. Grunzke, Rebecca Z. Grunzke, 2025-06-12 This edited volume examines the ways in which the representation of female teachers on television has developed from the advent of the medium up to the present day Despite the widely feminized nature of the teaching profession the first depictions of female teachers on television did not occur until over a century later Contributors analyze a variety of programs spanning time periods audiences and genre to provide insight into the past present and future trajectory of increasingly multidimensional portrayals of female teachers Scholars of television media gender women s and cultural studies will find this book of particular interest *AI and Machine Learning Applications in Sports Analytics* Choudhury, Tanupriya, Arya, Pradeep Kumar, Kotecha, Ketan, Sharma, Ashutosh, Um, Jung-Sup, 2025-05-13 Artificial intelligence AI and machine learning ML revolutionize sports by transforming how teams coaches and analysts understand and optimize performance These technologies enable the collection processing and interpretation of data ranging from player biometrics and in game statistics to video footage and fan engagement metrics By uncovering patterns and insights that are difficult to detect manually AI and ML improve game strategies prevent injuries scout talent and enhance the overall spectator experience As the sports industry embraces data driven decision making the role of AI and ML in sports analytics continues to grow *AI and Machine Learning Applications in Sports Analytics* explores the possibilities offered by AI and ML within the realm of sports analytics It examines various applications of these technologies including player performance analysis game strategy optimization injury prediction talent scouting and fan engagement This book covers topics such as sports science neural networks and data analytics and is a useful resource for sports professionals medical and healthcare workers coaches engineers academicians researchers and data scientists *Artificial Intelligence XXXIV* Max Bramer, Miltos Petridis, 2017-12-01 This book constitutes the proceedings of the 37th SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence AI 2017 held in Cambridge UK in December 2017 The 25 full papers and 12 short papers presented in this volume were carefully reviewed and selected from 55 submissions There are technical and application papers which were organized in topical sections named machine learning and neural networks machine learning speech and vision and fuzzy logic short technical papers AI for healthcare applications of machine learning applications of neural networks and fuzzy logic case based reasoning AI techniques and short applications papers *Mathematical Reviews* ,2000 **Applied Mechanics Reviews** ,1993 **Summer To Summer Movie Reviews** Clay Scott Brown, 2021-11-04 With this year s Third Edition of my Movie Review book Summer To Summer I have begun to explore the Auteur in film Last Week in End Times Cinema A. S. Hamrah, 2025-11-25 An almanac of every bad thing that happened in the film industry from March 2024 to March 2025 From A S Hamrah the film critic at n 1 and the author of *The Earth Dies Streaming* Film Writing 2002 2018 comes this unique archive of unfortunate movie bulletins compiled for his weekly newsletter Last Week in End Times Cinema and presented here in digest form These customized batches of misfortune and upheaval record a full year of wrong thinking bad decisions and man made disasters from the world of

filmmaking Set against the backdrop of the crazed push for AI the wildfires in Los Angeles and the reelection of Donald Trump the general disaster of current commercial cinema in the age of streaming platforms theater closures and the dead end reliance on IP franchising becomes apparent As the Hollywood film industry plunged into near irrelevance these weekly roundups tracked every passing mistake every easily avoided blunder every up to the minute example of unnecessary garbage as it emerged from the content mills of our newly tech based movie business Presented without commentary footnotes or links inspired by Felix Fennel's Novels in Three Lines and the Coffee News this compilation lists film/land items in naked form stripped of any ameliorating showbiz happy talk As Fred Allen once wrote about Hollywood beneath all that phony tinsel there is real tinsel Here it is all the shiny nothingness of an industry gone astray

Research and Development in Intelligent Systems XXIX Max Bramer, Miltos Petridis, 2012-10-30 The papers in this volume are the refereed papers presented at AI 2012 the Thirty second SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence held in Cambridge in December 2012 in both the technical and the application streams They present new and innovative developments and applications divided into technical stream sections on Data Mining Data Mining and Machine Learning Planning and Optimisation and Knowledge Management and Prediction followed by application stream sections on Language and Classification Recommendation Practical Applications and Systems and Data Mining and Machine Learning The volume also includes the text of short papers presented as posters at the conference This is the twenty ninth volume in the Research and Development in Intelligent Systems series which also incorporates the twentieth volume in the Applications and Innovations in Intelligent Systems series These series are essential reading for those who wish to keep up to date with developments in this important field

Mastering Machine Learning with Spark 2.x Alex Tellez, Max Pumperla, Michal Malohlava, 2017-08-31 Unlock the complexities of machine learning algorithms in Spark to generate useful data insights through this data analysis tutorial About This Book Process and analyze big data in a distributed and scalable way Write sophisticated Spark pipelines that incorporate elaborate extraction Build and use regression models to predict flight delays Who This Book Is For Are you a developer with a background in machine learning and statistics who is feeling limited by the current slow and small data machine learning tools Then this is the book for you In this book you will create scalable machine learning applications to power a modern data driven business using Spark We assume that you already know the machine learning concepts and algorithms and have Spark up and running whether on a cluster or locally and have a basic knowledge of the various libraries contained in Spark What You Will Learn Use Spark streams to cluster tweets online Run the PageRank algorithm to compute user influence Perform complex manipulation of DataFrames using Spark Define Spark pipelines to compose individual data transformations Utilize generated models for off line on line prediction Transfer the learning from an ensemble to a simpler Neural Network Understand basic graph properties and important graph operations Use GraphFrames an extension of DataFrames to graphs to study graphs using an elegant query language Use K means

algorithm to cluster movie reviews dataset In Detail The purpose of machine learning is to build systems that learn from data Being able to understand trends and patterns in complex data is critical to success it is one of the key strategies to unlock growth in the challenging contemporary marketplace today With the meteoric rise of machine learning developers are now keen on finding out how can they make their Spark applications smarter This book gives you access to transform data into actionable knowledge The book commences by defining machine learning primitives by the MLlib and H2O libraries You will learn how to use Binary classification to detect the Higgs Boson particle in the huge amount of data produced by CERN particle collider and classify daily health activities using ensemble Methods for Multi Class Classification Next you will solve a typical regression problem involving flight delay predictions and write sophisticated Spark pipelines You will analyze Twitter data with help of the doc2vec algorithm and K means clustering Finally you will build different pattern mining models using MLlib perform complex manipulation of DataFrames using Spark and Spark SQL and deploy your app in a Spark streaming environment Style and approach This book takes a practical approach to help you get to grips with using Spark for analytics and to implement machine learning algorithms We ll teach you about advanced applications of machine learning through illustrative examples These examples will equip you to harness the potential of machine learning through Spark in a variety of enterprise grade systems

Multiple Information Source Bayesian Optimization Antonio Candelieri,Andrea Ponti,Francesco Archetti,2025-10-01 The book provides a comprehensive review of multiple information sources and multi fidelity Bayesian optimization specifically focusing on the novel Augmented Gaussian Process methodology The book is important to clarify the relations and the important differences in using multi fidelity or multiple

information source approaches for solving real world problems Choosing the most appropriate strategy depending on the specific problem features ensures the success of the final solution The book also offers an overview of available software tools in particular it presents two implementations of the Augmented Gaussian Process based Multiple Information Source Bayesian Optimization one in Python and available as a development branch in BoTorch and finally a comparative analysis against other available multi fidelity and multiple information sources optimization tools is presented considering both test problems and real world applications The book will be useful to two main audiences 1 PhD candidates in Computer Science Artificial Intelligence Machine Learning and Optimization 2 Researchers from academia and industry who want to implement effective and efficient procedures for designing experiments and optimizing computationally expensive experiments in domains like engineering design material science and biotechnology

AI Frameworks and Tools for Software Development Patel, Rahul K.,2025-04-29 The rapid advancements in artificial intelligence AI are transforming how organizations approach software development creating both opportunities and challenges in the workplace As AI tools become more mainstream understanding their role as well as the responsibilities of users is crucial for ensuring their effective integration into software development processes A clear framework for introducing AI in Information Systems Management can significantly enhance the efficiency and effectiveness of development teams and their external stakeholders AI Frameworks and Tools for Software Development presents the best practices research findings and guidelines for using AI frameworks and tools in software development It provides a holistic understanding of these key processes functions and workflows that are essential for effective Software Development Lifecycle SDLC Covering topics such as industrial automation knowledge management and code reusability this book is an excellent resource for software developers computer scientists professionals researchers scholars academicians and more

Enterprise Guide for Implementing Generative AI and Agentic AI Shakuntala Gupta Edward,Rahul Bhattacharya,Vikas Sinha,2025-11-29 Generative AI and Agentic AI together are revolutionizing the technology landscape with profound and far reaching impacts across industries Organizations are increasingly adopting these technologies to drive innovation enhance unstructured content management and improve problem solving capabilities With Agentic AI enterprises are moving towards the development of intelligent systems that can plan reason and act with autonomy While early proof of concepts POCs demonstrated the potential of these technologies the current shift is toward responsible and scalable production implementations that leverage both generative and agentic capabilities This book begins by guiding you through the technological evolution of AI from early machine learning to today s large language models LLMs and agentic systems It then explores a wide range of use cases across industries highlighting how LLMs can support decision making and how Agentic AI enables dynamic collaborative systems that act with autonomy and intent This is followed by Design Patterns across the lifecycle of AI solution development deployment and monitoring Readers will then gain insights into the methodologies for developing and deploying Generative

and Agentic AI solutions at an enterprise level A featured implementation demonstrates how Agentic AI can be effectively put into action The book also introduces essential concepts such as MLOps LLMOps and Responsible AI principles which are critical for transitioning the AI solutions from experimentation to production These principles ensure that AI deployments are scalable secure ethical and compliant The book concludes with key takeaways and best practices for developing evaluating deploying and scaling AI applications responsibly and effectively within enterprise settings You Will Understand key design patterns to develop deploy and monitor a Generative AI solution effectively Learn how to develop and implement a production ready Agentic AI use case Discover best practices for building scalable secure and enterprise grade AI solutions Understand how to assess and mitigate risks using Responsible AI principles and LLMOps best practices This book is for Enterprise Software Engineers and Architects **Unscaled** Hemant Taneja,2018-03-27 Unscaled identifies the forces that are reshaping the global economy and turning one of the fundamental laws of business and society the economies of scale on its head An innovative trend combining technology with economics is unraveling behemoth industries including corporations banks farms media conglomerates energy systems governments and schools that have long dominated business and society Size and scale have become a liability A new generation of upstarts is using artificial intelligence to automate tasks that once required expensive investment and renting technology platforms to build businesses for hyper focused markets enabling them to grow big without the bloat of giant organizations In Unscaled venture capitalist Hemant Taneja explains how the unscaled phenomenon allowed Warby Parker to cheaply and easily start a small company build a better product and become a global competitor in no time upending entrenched eyewear giant Luxottica It similarly enabled Stripe to take on established payment processors throughout the world and Livongo to help diabetics control their disease while simultaneously cutting the cost of treatment The unscaled economy is remaking massive deeply rooted industries and opening up fantastic possibilities for entrepreneurs imaginative companies and resourceful individuals It can be the model for solving some of the world s greatest problems including climate change and soaring health care costs but will also unleash new challenges that today s leaders must address Nuclear Science Abstracts ,1973-09 *PC Mag* ,1985-10-15 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology *ECAI 2023* Kobi Gal,Ann Nowé,Grzegorz J.
