Lamothe, Donna J. Barbie, 2020-07-15 At their basic level sporting events are about numbers wins and losses percentages and points shots and saves clocks and countdowns However sports narratives quickly leave the realm of statistics The stories we tell and retell sometimes for decades make sports dramatic and compelling Just like any great drama sports imply conflict not just battles on the field of play but clashes of personalities goals and strategies In telling these stories we create heroes but we also create villains This book is about the latter those players who transgress norms and expectations and who we label the bad boys of sports Using a variety of approaches these 13 new essays examine the cultural social and rhetorical implications of sports villainy Each chapter focuses on a different athlete and sport questioning issues such as how notorious sports figures are defined to be bad within particular sports and within the larger culture the role media play in creating antiheroes fan reactions when players

cross boundaries and how those boundaries shift depending on the athlete's gender, sexuality and race **Do the Math!** John K. White, 2012-03-13 How do pyramid scams work? Are reality television shows fair? Why are sports so uncompetitive? Who really broke the bank in 2009? Our world has become more complicated and the notion of growth at any cost has led to constant economic uncertainty, a permanently stressed-out workforce, and everyday stories of government and corporate abuse. Author John K. White argues that a better knowledge of basic systems is needed to understand the world we live in, from pyramid scams to government bailouts, from sports leagues to stock markets, from the everyday to the seemingly complex. *Do the Math* is a fresh look at the numbers of daily living, providing a thought-provoking guide to better understanding the world around us and enlightening consumers about misleading practices. Numerous creative examples and illustrative figures help to explain the realities of our ever-confusing mathematical world and modern economic and contemporary social issues. *Do the Math* links mathematical concepts to real-world examples. *Do the Math: Understand The Normal Curve and Debt and Demographics in 100 seconds*. *Do the Math* was featured in *The Best Writing on Mathematics 2019* by Mircea Pitici, a book about the best mathematics writing since 2010. Forced to deal with sullen managers and explosive players, they often take the blame for the failures of both. But let's face it: umpires are only human. For well over a century, the fortunes of Major League teams and the fabric of baseball history itself have been dramatically affected by the flawed decisions of officials. While the use of video replay in recent decades has reduced the number of bitter disputes, many situations remain exempt from review and are subject to swirling controversy. In the heat of the moment, mistakes are often made, sometimes with monumental consequences. This book details some of these more controversial calls and the men who made them. Sports Capitalism Frank P. Jozsa, 2017-11-28 The book focuses on how, when, where, and why the US-based professional sports leagues extend their brands and penetrate markets in nations across the globe. The book examines the strategies, progress, and expectations of each league despite the cultural, economic, and political barriers that exist between and within countries and areas. It offers a model of the sports business and where appropriate, the emergence, evolution, and growth of prominent women's sports leagues are documented. This book is unique as there are no other academic publications that study and report the global ambitions of this special group of organizations in one volume. Readers such as college and university sports, history, management, marketing, and international business professors, students, and researchers

can use and apply the book as either a teaching supplement reference and or literature source It will also appeal to targeted groups beyond the academic community with strategic economic incentives to learn about sports capitalism such as sports entrepreneurs and league officials

Cinderella's Slipper Mike Nemeth,2009-09 The Bowl Champion Series BCS is under fire from fans the media college coaches Congress and even our new President They worry that the two best teams in the country aren t consistently selected by the polls and the BCS computers to play for the National Championship At stake is prestige a place in history recruiting advantages and boatloads of cash The solution proposed most often is a playoff system to give more schools a shot

at a title However the problem of team selection won't go away with a playoff system it will be exacerbated The lack of a credible ranking system is the Achilles heel of the current BCS system Cinderella's Slipper reveals why the polls get it wrong why the BCS computers can't be expected to get it right why traditional statistics aren't useful for ranking teams and why won't records are misleading Cinderella's Slipper introduces the performance metrics necessary for team ranking and explains the rating system that can accurately rank teams with similar records When combined with NCAA sponsorship and an accurate ranking system a playoff scheme will produce deserving champions and will restore public confidence in the college football National Championship process
