Applications for Health Care Mitul Kumar Ahirwal,Narendra D. Londhe,Anil Kumar,2022-04-19 This book takes an interdisciplinary approach by covering topics on health care and artificial intelligence Data sets related to biomedical signals ECG EEG EMG and images X rays MRI CT are explored analyzed and processed through different computation intelligence

methods Applications of computational intelligence techniques like artificial and deep neural networks swarm optimization expert systems decision support systems clustering and classification techniques on medial datasets are explained Survey of medical signals medial images and computation intelligence methods are also provided in this book Key Features Covers computational Intelligence techniques like artificial neural networks deep neural networks and optimization algorithms for Healthcare systems Provides easy understanding for concepts like signal and image filtering techniques Includes discussion over data preprocessing and classification problems Details studies with medical signal ECG EEG EMG and image X ray FMRI CT datasets Describes evolution parameters such as accuracy precision and recall etc This book is aimed at researchers and graduate students in medical signal and image processing machine and deep learning and healthcare technologies

Google Cloud Platform for Data Engineering Alasdair Gilchrist, Google Cloud Platform for Data Engineering is designed to take the beginner through a journey to become a competent and certified GCP data engineer The book therefore is split into three parts the first part covers fundamental concepts of data engineering and data analysis from a platform and technology neutral perspective Reading part 1 will bring a beginner up to speed with the generic concepts terms and technologies we use in data engineering The second part which is a high level but comprehensive introduction to all the concepts components tools and services available to us within the Google Cloud Platform Completing this section will provide the beginner to GCP and data engineering with a solid foundation on the architecture and capabilities of the GCP Part 3 however is where we delve into the moderate to advanced techniques that data engineers need to know and be able to carry out By this time the raw beginner you started the journey at the beginning of part 1 will be a knowledgeable albeit inexperienced data engineer However by the conclusion of part 3 they will have gained the advanced knowledge of data engineering techniques and practices on the GCP to pass not only the certification exam but also most interviews and practical tests with confidence In short part 3 will provide the prospective data engineer with detailed knowledge on setting up and configuring DataProc GCPs version of the Spark Hadoop ecosystem for big data They will also learn how to build and test streaming and batch data pipelines using pub sub dataFlow and BigQuery Furthermore they will learn how to integrate all the ML and AI Platform components and APIs They will be accomplished in connecting data analysis and visualisation tools such as Datalab DataStudio and AI notebooks amongst others They will also by now know how to build and train a TensorFlow DNN using APIs and Keras and optimise it to run large public data sets Also they will know how to provision and use Kubeflow and Kube Pipelines within Google Kubernetes engines to run container workloads as well as how to take advantage of serverless technologies such as Cloud Run and Cloud Functions to build transparent and seamless data processing platforms The best part of the book though is its compartmental design which means that anyone from a beginner to an intermediate can join the book at whatever point they feel comfortable
