How Machine Learning is Innovating Today's World Arindam Dey, Sukanta Nayak, Ranjan Kumar, Sachi Nandan Mohanty, 2024-07-23 Provides a comprehensive understanding of the latest advancements and practical applications of machine learning techniques Machine learning ML a branch of artificial intelligence has gained tremendous momentum in recent years revolutionizing the way we analyze data make predictions and solve complex problems As researchers and practitioners in the field the editors of this book recognize the importance of disseminating knowledge and fostering collaboration to further advance this dynamic discipline How Machine Learning is Innovating Today s World is a timely book and presents a diverse collection of 25 chapters that delve into the remarkable ways that ML is transforming various fields and industries It provides a comprehensive understanding of the practical applications of ML techniques The wide range of topics include An analysis of various tokenization techniques and the sequence to sequence model in natural language processing explores the evaluation of English language readability using ML models a detailed study of text analysis for information retrieval through natural language processing the application of reinforcement learning approaches to supply chain management the performance analysis of converting algorithms to source code using natural language processing in Java presents an alternate approach to solving differential equations utilizing artificial neural networks with optimization techniques a comparative study of different techniques of text to SQL query conversion the classification of livestock diseases using ML algorithms ML in image enhancement techniques the efficient leader selection for inter cluster flying ad hoc networks a comprehensive survey of applications powered by GPT 3 and DALL E recommender systems domain of application reviews mood detection emoji generation and classification using tokenization and CNN variations of the exam scheduling problem using graph coloring the intersection of software engineering and machine learning applications explores ML strategies for indeterminate information systems in complex bipolar neutrosophic environments ML applications in healthcare in battery management systems and the rise of AI generated news videos how to enhance resource management in precision farming through AI based irrigation optimization Audience The book will be extremely useful to professionals post graduate research scholars

policymakers corporate managers and anyone with technical interests looking to understand how machine learning and artificial intelligence can benefit their work *Conversational AI* Michael McTear, 2022-05-31 This book provides a comprehensive introduction to Conversational AI While the idea of interacting with a computer using voice or text goes back a long way it is only in recent years that this idea has become a reality with the emergence of digital personal assistants smart speakers and chatbots Advances in AI particularly in deep learning along with the availability of massive computing power and vast amounts of data have led to a new generation of dialogue systems and conversational interfaces Current research in Conversational AI focuses mainly on the application of machine learning and statistical data driven approaches to the development of dialogue systems However it is important to be aware of previous achievements in dialogue technology and to consider to what extent they might be relevant to current research and development Three main approaches to the development of dialogue systems are reviewed rule based systems that are handcrafted using best practice guidelines statistical data driven systems based on machine learning and neural dialogue systems based on end to end learning Evaluating the performance and usability of dialogue systems has become an important topic in its own right and a variety of evaluation metrics and frameworks are described Finally a number of challenges for future research are considered including multimodality in dialogue systems visual dialogue data efficient dialogue model learning using knowledge graphs discourse and dialogue phenomena hybrid approaches to dialogue systems development dialogue with social robots and in the Internet of Things and social and ethical issues **Software Engineering and Advanced Applications** Davide Taibi, Darja Smite, 2025-10-09 This three volume set constitutes the refereed proceedings of the 51st Euromicro Conference on Software Engineering and Advanced Applications SEAA 2025 held in Salerno Italy during September 10 12 2025 The 62 full papers were carefully reviewed and selected from 177 submissions These papers were organized in the following topical sections Part I Data and AI Driven Engineering Cyber Physical Systems Model Driven Engineering and Modeling Languages Part II Practical Aspects of Software Engineering Systematic Literature Reviews and Mapping Studies in Software Engineering Part III Software Management Measurement Peopleware and Innovation Software Process and Product Improvement Software Analytics Mining Software Open Datasets and Repositories Emerging Computing Technologies *Building a God* Christopher DiCarlo, 2025-01-21 Renowned ethicist provides essential guide to successfully navigating the future AI landscape In *Building a God* Christopher DiCarlo explores the profound implications of artificial intelligence surpassing human intelligence a destiny that seems not just possible but inevitable At this critical crossroad in our evolutionary history DiCarlo a renowned ethicist in AI delves into the ethical mazes and technological quandaries of our future interactions with superior AI entities From healthcare enhancements to the risks of digital manipulation this book scrutinizes AI's dual potential to elevate or devastate humanity DiCarlo advocates for robust global governance of AI proposing visionary policies to safeguard our society AI will positively impact our lives in myriad ways from healthcare to education manufacturing to

sustainability AI powered tools will improve productivity and add ease to the most massive global industries and to our own personal daily routines alike But we have already witnessed the tip of the iceberg when it comes to the risks of this new technology AI algorithms can manipulate human behavior spread disinformation shape public opinion and impact democratic processes Sophisticated technologies such as GPT 4 Dall E 2 and video Deepfakes allow users to create distort and alter information Perhaps more troubling is the foundational lack of transparency in both the utilization and design of AI models What ethical precepts should be determined for AI and by whom And what will happen if rogue abusers decide not to comply with such ethical guidelines How should we enforce these precepts Should the UN develop a Charter or Accord which all member states agree to and sign off on Should governments develop a form of international regulative body similar to the International Atomic Energy Agency IAEA which regulates not only the use of nuclear energy but nuclear weaponry as well In this incisive and cogent meditation on the future of AI DiCarlo argues for the ethical governance of AI by identifying the key components obstacles and points of progress gained so far by the global community and by putting forth thoughtful and measured policies to regulate this dangerous technology How AI Will Shape Our Future Pedro URIA-RECIO, 2024-11-20
