*Prompt Engineering for LLMs* John Berryman, Albert Ziegler, 2024-11-04 Large language models LLMs are revolutionizing the world promising to automate tasks and solve complex problems A new generation of software applications are using these models as building blocks to unlock new potential in almost every domain but reliably accessing these capabilities requires new skills This book will teach you the art and science of prompt engineering the key to unlocking the true potential of LLMs Industry experts John Berryman and Albert Ziegler share how to communicate effectively with AI transforming your ideas into a language model friendly format By learning both the philosophical foundation and practical techniques you ll be equipped with the knowledge and confidence to build the next generation of LLM powered applications Understand LLM architecture and learn how to best interact with it Design a complete prompt crafting strategy for an application Gather triage and present context elements to make an efficient prompt Master specific prompt crafting techniques like few shot learning chain of thought prompting and RAG

*Building Business-Ready Generative AI Systems* Denis Rothman, 2025-07-25 Supercharge your business with context aware AI controllers adaptive agents multimodal reasoning functionality neuroscientific memory systems and flexible handler mechanisms that integrate the emerging generative AI models Get with your book PDF copy AI Assistant and Next Gen Reader free Key Features Build an adaptive context aware AI controller with advanced memory strategies Enhance GenAISys with multi domain multimodal reasoning capabilities and Chain of Thought CoT Seamlessly integrate cutting edge OpenAI and DeepSeek models as you see fit Book Description Standalone LLMs no longer deliver sufficient business value on their own This guide moves beyond basic chatbots showing you how to build agentic ChatGPT grade systems capable of sophisticated semantic and sentiment analysis powered by context engineering You ll design AI controller architectures with multi user memory retention to dynamically adapt your system to diverse user and system inputs You ll architect a Retrieval Augmented Generation system with Pinecone to combine instruction driven scenarios Through context engineering you ll minimize token usage maximize response quality and create systems that reason across complex tasks with precision You ll enhance your system s intelligence with multimodal capabilities image generation voice interactions and machine driven reasoning leveraging Chain of Thought and context chaining to address cross domain automation challenges You ll also integrate OpenAI s suite and DeepSeek R1 without disrupting your existing GenAISys ecosystem With context engineering as the backbone every step becomes a deliberate act of shaping model behavior Your GenAISys will apply neuroscience inspired insights to marketing strategies predict human mobility integrate smoothly into human workflows and connect to live external data all wrapped in a polished investor ready interface What you will learn Implement an AI controller with a conversation AI agent and orchestrator at its core Build contextual awareness with short term long term and cross session memory Design cross domain automation with multimodal reasoning image generation and voice features Expand a CoT agent by integrating consumer memory

understanding Integrate cutting edge models of your choice without disrupting your existing GenAISys Connect to real time external data while blocking security breaches Who this book is for This book is for AI and Machine Learning Engineers seeking to enhance their understanding of Generative AI and its enterprise applications It will particularly benefit those interested in building AI agents creating advanced orchestration systems and leveraging AI for automation in marketing production and logistics Software architects and enterprise developers looking to build scalable AI driven systems will also find immense value in this guide No prior superintelligence experience is necessary but familiarity with AI concepts is recommended

*Data Science Solutions on Azure* Julian Soh,Priyanshi Singh,2024-11-18 This revamped and updated book focuses on the latest in AI technology Generative AI It builds on the first edition by moving away from traditional data science into the area of applied AI using the latest breakthroughs in Generative AI Based on real world projects this edition takes a deep look into new concepts and approaches such as Prompt Engineering testing and grounding of Large Language Models fine tuning and implementing new solution architectures such as Retrieval Augmented Generation RAG You will learn about new embedded AI technologies in Search such as Semantic and Vector Search Written with a view on how to implement Generative AI in software this book contains examples and sample code In addition to traditional Data Science experimentation in Azure Machine Learning AML that was covered in the first edition the authors cover new tools such as Azure AI Studio specifically for testing and experimentation with Generative AI models What s New in this Book Provides new concepts tools and technologies such as Large and Small Language Models Semantic Kernel and Automatic Function Calling Takes a deeper dive into using Azure AI Studio for RAG and Prompt Engineering design Includes new and updated case studies for Azure OpenAI Teaches about Copilots plugins and agents What You ll Learn Get up to date on the important technical aspects of Large Language Models based on Azure OpenAI as the reference platform Know about the different types of models GPT3 5 Turbo GPT4 GPT4o Codex DALL E and Small Language Models such as Phi 3 Develop new skills such as Prompt Engineering and fine tuning of Large Small Language Models Understand and implement new architectures such as RAG and Automatic Function Calling Understand approaches for implementing Generative AI using LangChain and Semantic Kernel See how real world projects help you identify great candidates for Applied AI projects including Large Small Language Models Who This Book Is For Software engineers and architects looking to deploy end to end Generative AI solutions on Azure with the latest tools and techniques

*Open AI and Computational Intelligence for Society 5.0* Pandey, Rajiv,Srivastava, Nidhi,Prasad, Rajesh,Prasad, Jayashree,Garcia, Manuel B.,2024-11-29 As technology rapidly advances the complexity of societal challenges grows necessitating intelligent solutions that can adapt and evolve However developing such solutions requires a deep understanding of computational intelligence CI and its application in addressing real world problems Moreover ethical considerations surrounding AI such as bias and accountability are crucial to ensure responsible development and deployment of intelligent systems Open AI and Computational Intelligence for Society 5 0 offers a

comprehensive exploration of CI providing insights into intelligent systems theory design and application This book is a practical guide for scientists engineers and researchers seeking to develop thoughtful solutions for complex societal issues Integrating disruptive technologies and frameworks illuminates the path toward creating intelligent machines collaborating with humans to enhance problem solving and improve quality of life Programming Large Language Models with Azure Open AI Francesco Esposito,2024-04-03 Use LLMs to build better business software applications Autonomously communicate with users and optimize business tasks with applications built to make the interaction between humans and computers smooth and natural Artificial Intelligence expert Francesco Esposito illustrates several scenarios for which a LLM is effective crafting sophisticated business solutions shortening the gap between humans and software equipped machines and building powerful reasoning engines Insight into prompting and conversational programming with specific techniques for patterns and frameworks unlock how natural language can also lead to a new advanced approach to coding Concrete end to end demonstrations featuring Python and ASP NET Core showcase versatile patterns of interaction between existing processes APIs data and human input Artificial Intelligence expert Francesco Esposito helps you Understand the history of large language models and conversational programming Apply prompting as a new way of coding Learn core prompting techniques and fundamental use cases Engineer advanced prompts including connecting LLMs to data and function calling to build reasoning engines Use natural language in code to define workflows and orchestrate existing APIs Master external LLM frameworks Evaluate responsible AI security privacy and accuracy concerns Explore the AI regulatory landscape Build and implement a personal assistant Apply a retrieval augmented generation RAG pattern to formulate responses based on a knowledge base Construct a conversational user interface For IT Professionals and Consultants For software professionals architects lead developers programmers and Machine Learning enthusiasts For anyone else interested in natural language processing or real world applications of human like language in software Generative AI Security Ken Huang,Yang Wang,Ben Goertzel,Yale Li,Sean Wright,Jyoti Ponnappalli,2024-04-05 This book explores the revolutionary intersection of Generative AI GenAI and cybersecurity It presents a comprehensive guide that intertwines theories and practices aiming to equip cybersecurity professionals CISOs AI researchers developers architects and college students with an understanding of GenAI s profound impacts on cybersecurity The scope of the book ranges from the foundations of GenAI including underlying principles advanced architectures and cutting edge research to specific aspects of GenAI security such as data security model security application level security and the emerging fields of LLMOps and DevSecOps It explores AI regulations around the globe ethical considerations the threat landscape and privacy preservation Further it assesses the transformative potential of GenAI in reshaping the cybersecurity landscape the ethical implications of using advanced models and the innovative strategies required to secure GenAI applications Lastly the book presents an in depth analysis of the security challenges and potential solutions specific to GenAI and a forward looking view of how it can redefine cybersecurity practices

By addressing these topics it provides answers to questions on how to secure GenAI applications as well as vital support with understanding and navigating the complex and ever evolving regulatory environments and how to build a resilient GenAI security program The book offers actionable insights and hands on resources for anyone engaged in the rapidly evolving world of GenAI and cybersecurity

**Real-Time Data Decisions With AI and ChatGPT Techniques** Sharma, Priyanka,Jyotiyana, Monika,Kumar, A.V. Senthil,2024-09-19 Modern businesses face the challenge of how to most effectively harness the power of Artificial Intelligence AI to enhance customer engagement and streamline operations The proliferation of AI tools like ChatGPT offers immense potential Yet businesses often need help to navigate the complexities of implementation and maximize the benefits This gap between AI s promise and its practical application highlights the need for a comprehensive resource that offers practical insights and innovative strategies Real Time Data Decisions With AI and ChatGPT Techniques is a groundbreaking book that addresses this critical challenge By providing a detailed analysis of ChatGPT and other AI tools this book equips businesses with the knowledge and strategies needed to leverage AI effectively From algorithmic enhancements to real world applications each chapter offers valuable insights and actionable recommendations making this book an indispensable guide for businesses seeking to capitalize on AI s transformative potential

**The Co-Intelligence Revolution** Venkat Ramaswamy,2025-05-16 We stand at the dawn of a new industrial revolution not one defined by automation and substitution of human intelligence but by co intelligence where human ingenuity and artificial intelligence AI as a different kind of intelligence collaborate in ways never imagined The Co Intelligence Revolution is a visionary road map for this emerging era which will redefine human experiences innovations and economic and social systems reshaping not just how we work but also how we live With over a hundred compelling real world examples from over twenty five ecosystems from L Or al s inclusive beauty platforms through Siemens s industrial metaverse to India s Digital Public Infrastructures DPIs expanding access to finance citizen services and education the book illustrates co intelligent enterprises across private public and plural sectors unlocking new frontiers of value The Co Intelligence Revolution is a call to action to co create a world where intelligence emerges from the interactive ever evolving relationships between humans AI and ecosystems
