Read the short passage and answer the questions.

The Dog and the Shadow

It happened that a Dog had got a piece of meat and was carrying it home in his mouth to eat it in peace. Now on his way home, he had to cross a plank lying across a running brook. As he crossed, he looked down and saw his own shadow reflected in the water beneath. Thinking it was another dog with another piece of meat, he made up his mind to have that also. So he made a snap at the shadow in the water, but as he opened his mouth the piece of meat fell out, dropped into the water and was never seen more.

1. What animal was crossing a board?

2. What did the dog have in his mouth?

3. What did the dog see in the running brook?

4. What is the moral of the story?

or heal a wide variety of ailments and improve one's overall health and well-being offering a step-by-step approach for developing one's cardiovascular capacity strength and flexibility **Towards a Synthesis?**, 2023-10-16 The 1980's and early 1990's were witness to controversial discussions concerning the nature and role of philology in medieval studies. Some scholars defended the values and methods of tradition while others argued for a break with the past and the need to rethink medieval studies in the light of a post-modern episteme. The essays in this book reflect the vigour of the debate with reference to romance studies particularly Old French. Taken collectively they argue not for a choice between two extreme positions but rather a synthesis that combines the best of both worlds. The contributors are Donald Maddox, Richard F O Gorman, William D Paden, Rupert T Pickens, Barbara N Sargent Baur, Evelyn Birge Vitz, Haijo Westra and Keith Busby.

Sports, Exercise, and Fitness Mary Beth Allen, 2005-03-30 For reference librarians and researchers seeking information on sports and fitness this guide is an important first stop. For collection development specialists it is an invaluable selection guide. Allen describes and evaluates over 1 000 information sources on the complete spectrum of sports from basketball football and hockey to figure skating table tennis and weight training. Focusing on English language works published between 1990 and the present the guide thoroughly covers traditional reference sources such as encyclopedias and bibliographies along with instructional sources in print formats online databases and Web sites. To enable users in search of information on specific sports or fitness activities chapters are organized thematically according to broad type aquatic sports nautical sports precision and accuracy racket sports ice and snow sports ball sports cycling and so on with subcategories for such individual sports as soccer golf and yoga. Within these categories works are further organized by type reference instructional and Web sites *Web Page Recommendation Models* Sule Gunduz-Oguducu, 2022-06-01 One of the application areas of data mining is the World Wide Web WWW or Web which serves as a huge widely distributed global information service for every kind of information such as news advertisements consumer information financial management education government e-commerce health services and many other information services. The Web also contains a rich and dynamic collection of hyperlink information. Web page access and usage information providing sources for data mining. The amount of information on the Web is growing rapidly as well as the number of Web sites and Web pages per Web site. Consequently it has become more difficult to find relevant and useful information for Web users. Web usage mining is concerned with guiding the Web users to discover useful knowledge and supporting them for decision making. In that context predicting the needs of a Web user as she visits Web sites has gained importance. The requirement for predicting user needs in order to guide the user in a Web site and improve the usability of the Web site can be addressed by recommending pages to the user that are related to the interest of the user at that time. This monograph gives an overview of the research in the area of discovering and modeling the user's interest in order to recommend related Web pages. The Web page recommender systems studied in this monograph are categorized according to the data mining algorithms they use for recommendation.
