Web 2.0 Miltiadis D. Lytras, Ernesto Damiani, Patricia Ordóñez de Pablos, 2008-10-20 While the web itself is about twenty years old businesses are still impleme ing the technology into the fabric of the business model The background section will focus on defining the building blocks for the framework including defining the basic components of Web 1 0 which focused on the presence and business transaction The Web 2 0 section will focus on defining the basic building blocks of customer interactions while the final section will focus on a review the wine industry 2 1 Web 1 0 Presence and Electronic Commerce The term Web 1 0 emerged from the research around the

development of Web 2.0 Prior to this researchers commonly referred to Web 1.0 as Electronic Commerce or E Business Where as web 1.0 focused on a read only web interface Web 2.0 focuses on a read write interface where value emerges from the contribution of a large volume of users The Internet initially focused on the command and control of the information itself Information was controlled by a relative small number of resources but distributed to a large number which spawned the massive growth of the web itself Like television before it the web allowed for the broadcasting of information to a large number of users Initial web sites were built simply to communicate presence or provide information on the business self This component includes information like marketing materials investor relations employment opportunities and product information
