Chapters in this book discuss how social and mobile media are becoming imperative when marketing a candidate's image, distributing messages, fundraising, and getting out the vote. While some chapters delve into a particular candidate's campaign, others discuss several campaigns in light of a particular political objective. Authors

Institutional Change in Education Colleen Mary Mallon, 2024-07-18. Do you want to implement diversity, equity, and inclusion initiatives at your institution but you don't know where to start? In the wake of the murder of George Floyd, a small Catholic secondary school erupted in controversy. Students and alumni took to social media to share stories of their own experiences with racism on campus. It was clear that the school's culture needed to change. Enter Sr. Colleen Mary Mallon, who joined the high school as the director of mission formation. Pursuing grassroots institutional reform, Sr. Colleen found a new meaning of theological education. In this candid volume, Sr. Colleen reflects on the challenges of molding her Dominican school to embody its charism of veritas. This commitment to truth required her school and her Dominican sisters to recognize their complicity in white supremacy and to center the concerns of marginalized communities. Educating faculty, staff, administrators, and parents in Catholic Social Teaching equipped them to bring their actions and the culture of the school into alignment with their professed values. Sr. Colleen's story offers one example of how schools can implement antiracist and antibias reforms. With its wealth of practical insights and discussion questions, *Inclusivity and Institutional Change in Education* will guide readers in effecting cultural change in their own institutions. **The Social Media Age** Zoetanya

Sujon, 2021-04-07. Exploring power and participation in a connected world, social media are all around us. For many, they are the first things to look at upon waking and the last thing to do before sleeping. Integrated seamlessly into our private and public lives, they entertain, inform, connect, and sometimes disconnect us. They're more than just social, though. In addition to our experiences as everyday users, understanding social media also means asking questions about our society, our culture, and our economy. What we find is dense connections between platform infrastructures and our experience of the social, shaped by power-shifting patterns of participation and a widening ideology of connection. This book introduces and examines the full scope of social media, from the social to the technological, from the everyday to platform industries, from the personal to the political. It brings together the key concepts, theories, and research necessary for making sense of the meanings and consequences of social media, both hopefully and critically. Dr. Zoetanya Sujon is a Senior Lecturer and Programme Director for Communications and Media at London College of Communication, University of the Arts London. *Proceedings of the 2nd UPY International Conference on Education and Social Science (UPINCESS 2023)* Ari Kusuma Wardana, 2023-12-31. This is an open access book. Technology has had a huge impact on education and social dynamics around the world. Since the introduction of information and communication technologies (ICTs) such as the internet, smartphones, and social media, much has changed in the way we learn and interact with others. In education, technology has enabled students and teachers to

access more diverse and engaging educational resources With internet access students and teachers can access educational resources from all over the world and learn about various topics and disciplines In addition technology also enables distance learning which allows students and teachers to connect from different locations However there are also negative impacts of using technology in education For example excessive use of social media and the internet can cause concentration disorders and addiction in students In addition too much reliance on technology can also reduce students ability to think critically and solve problems independently In social dynamics technology has allowed us to connect with people from all over the world and paved the way for greater collaboration and cultural exchange However technology has also brought negative impacts on social dynamics such as the spread of fake news or hoaxes cyberbullying and social media addiction In this regard technology can be a very useful tool if used wisely and with proper understanding of its impact Therefore to support this Universitas PGRI Yogyakarta was hold an international conference and Call for Papers The 2nd UPY International Conference on Education and Social Science UPINCESS The Impact of Technology on Education and Social Dynamics on September 27 2023 The conference aims to discuss in depth about the impact of technology on education and social dynamics as well as finding appropriate solutions and strategies to minimize its negative impact and maximize its benefits Experts researchers and practitioners in the field of education and technology from around the world can share their knowledge and experience in this conference and can encourage collaboration and innovation in this field
