Cost-sharing and Accessibility in Higher Education: A Fairer Deal? Pedro N. Teixeira, D. Bruce Johnstone, Maria J. Rosa, Hans Vossensteyn, 2007-11-23 Higher education finances lie at the crossroads in many Western countries. Hence worldwide the most common approach to the need for increasing revenue was to use some form or forms of cost sharing or the shift of some of the higher educational per student costs from governments and taxpayers to parents and students. This raises several important challenges to higher education systems. First there is the political and social controversy associated with most forms of cost sharing particularly with tuition fees. Secondly there are important issues in terms of the broad context of social policy such as the role of families and students and the relationship that the state establishes with each of them. Third there is the comparison of alternative instruments of cost sharing and the direct and indirect effects of each of them notably in terms of educational equality. Overall underlying cost sharing debates are fundamental questions about social choice, individual opportunities and the role of government in society. **Resources in Education**, 2000 Higher Education, Stratification, and Workforce Development Sheila Slaughter, Barrett Jay Taylor, 2015-11-17 This work analyses how political economic shifts contribute to competition within higher education systems in the US, EU and Canada. The authors highlight competition for prestige and public and private subsidies, exploring the consequences of these processes through theoretical and empirical analyses. Accordingly the work highlights topics that will be of interest to a wide range of audiences. Concepts addressed include stratification, privatization of formerly public subsidies, preference for high tech academic fields and the vocationalization of the curriculum i.e. Science, Technology, Engineering and Mathematics (STEM) fields, selected professions and business rather than the liberal arts or the Humboldtian vision of the university. Across national contexts and analytic methods authors analyze the growth of national policies that see universities as a sub set of economic development, casting universities as corporate research laboratories and education as central to job creation. Throughout the volume the authors make the case that national and regional approaches to politics and markets result in different experiences of consequences of academic capitalism. While these shifts serve the interests of some institutions others find themselves struggling to meet ever greater expectations with stagnant or shrinking resource bases.
