for hockey I make an impressive plus one Volunteering to be Harper s date to her dreaded ten year high school reunion is easy Pretending not to fall for her when our innocent kisses turn passionate is a little more challenging But when Harper returns the fake date favor and accompanies me to my parents anniversary party everything changes She garners my dad s respect and effortlessly mingles with my childhood friends She eases the familial pressure I drown under and makes me crave things I used to laugh off Tangling up with Harper was supposed to be a fun way to pass the summer So why does it feel like she s the real prize The elusive fleeting kind of real I ve avoided for years And how can I prove that this playboy wants a different kind of reward One that sounds a lot like commitment

All the Coffee Cups Josh Hara,2022-05-26 One morning Josh Hara found himself staring at the blank side of his empty coffee cup In his other hand was a pen He brought the two together and the first of hundreds of comic covered cups found its way onto the internet Years later the coffee cups had taken on a life of their own with jokes seasonal greetings and social commentary ranging from Game of Thrones memes to statements on the US presidential election being shared around the world as Hara overcame the perils of sketching on a curved surface while highly caffeinated With hundreds of cups now created All the Coffee Cups collects and preserves a particular moment in history one where pop culture and caffeine came together to create art

Capitalism, Power and Innovation Cecilia Rikap,2021-03-29 In contemporary global capitalism the most powerful corporations are innovation or intellectual monopolies The book s unique perspective focuses on how private ownership and control of knowledge and data have become a major source of rent and power The author explains how at the one pole these corporations concentrate income property and power in the United States China and in a handful of intellectual monopolies particularly from digital and pharmaceutical industries while at the other pole developing countries are left further behind The book includes detailed empirical mappings of how intellectual monopolies develop and transform knowledge from universities and open source collaborations into intangible assets The result is a strategy that combines undermining the commons through privatization with harvesting from the same commons The book ends with provoking reflections to tilt the scale against intellectual monopoly capitalism and arguing that desired changes require democratic mobilization of workers and citizens at large This book represents one of the first attempts to capture the contours of an emerging new era where old perspectives lead us astray and the old policy toolbox is hopelessly inadequate This is true for the idea that the best or only way to promote innovation is to transform knowledge into private property It is also true for anti trust policies focusing exclusively on consumer prices The formation of global infrastructures that lead to natural monopolies calls for public rather than private ownership Scholars and professionals from the social sciences and humanities in particular economics sociology political science geography educational science and science and technology studies will enjoy a clear and all embracing depiction of innovation dynamics in contemporary capitalism with a particular focus on asymmetries between actors regions and topics In fact its topical issue broadens the book s scope to those curious about how innovation networks shape our world
