Artificial Intelligence Applications in Chronic Ocular Diseases Wei Chi, Weihua Yang, Peirong Lu, Yanwu Xu, Huiying Liu, 2024-04-23 With the acceleration of urbanization and aging processes chronic ocular diseases have become a critical threat to the vision health of the global population Chronic ocular diseases include a series of disorders and conditions that involve long term defects in both anterior and posterior segments of the eye such as cataract glaucoma keratoconus KC diabetic retinopathy DR and age related macular degeneration AMD However it is still challenging to understand the mechanisms of these diseases and to discover new and reliable biomarkers to identify the diseases and their severities Moreover conventional methods in clinical societies are not as effective or efficient as expected especially in the era of artificial intelligence

Artificial Whiteness Yarden Katz, 2020-11-17 Dramatic statements about the promise and peril of artificial intelligence for humanity abound as an industry of experts claims that AI is poised to reshape nearly every sphere of life Who profits from the idea that the age of AI has arrived Why do ideas of AI's transformative potential keep reappearing in social and political discourse and how are they linked to broader political agendas Yarden Katz reveals the ideology embedded in the concept of artificial intelligence

contending that it both serves and mimics the logic of white supremacy He demonstrates that understandings of AI as a field and a technology have shifted dramatically over time based on the needs of its funders and the professional class that formed around it From its origins in the Cold War military industrial complex through its present day Silicon Valley proselytizers and eager policy analysts AI has never been simply a technical project enabled by larger data and better computing Drawing on intimate familiarity with the field and its practices Katz instead asks us to see how AI reinforces models of knowledge that assume white male superiority and an imperialist worldview Only by seeing the connection between artificial intelligence and whiteness can we prioritize alternatives to the conception of AI as an all encompassing technological force Bringing together theories of whiteness and race in the humanities and social sciences with a deep understanding of the history and practice of science and computing Artificial Whiteness is an incisive urgent critique of the uses of AI as a political tool to uphold social hierarchies
