[Generative AI with Python and TensorFlow 2](#) Joseph Babcock,Raghav Bali,2021-04-30 This edition is heavily outdated and we have a new edition with PyTorch examples published **Key Features** Code examples are in TensorFlow 2 which make it easy for PyTorch users to follow along Look inside the most famous deep generative models from GPT to MuseGAN Learn to build and adapt your own models in TensorFlow 2 x Explore exciting

cutting edge use cases for deep generative AI Book Description Machines are excelling at creative human skills such as painting writing and composing music Could you be more creative than generative AI In this book you ll explore the evolution of generative models from restricted Boltzmann machines and deep belief networks to VAEs and GANs You ll learn how to implement models yourself in TensorFlow and get to grips with the latest research on deep neural networks There s been an explosion in potential use cases for generative models You ll look at Open AI s news generator deepfakes and training deep learning agents to navigate a simulated environment Recreate the code that s under the hood and uncover surprising links between text image and music generation What you will learn Export the code from GitHub into Google Colab to see how everything works for yourself Compose music using LSTM models simple GANs and MuseGAN Create deepfakes using facial landmarks autoencoders and pix2pix GAN Learn how attention and transformers have changed NLP Build several text generation pipelines based on LSTMs BERT and GPT 2 Implement paired and unpaired style transfer with networks like StyleGAN Discover emerging applications of generative AI like folding proteins and creating videos from images Who this book is for This is a book for Python programmers who are keen to create and have some fun using generative models To make the most out of this book you should have a basic familiarity with math and statistics for machine learning

Generative AI with Python and Pytorch Joseph Babcock,Raghav Bali,2025-03-28 Master GenAI techniques to create images and text using variational autoencoders VAEs generative adversarial networks GANs LSTMs and large language models LLMs Key Features Implement real world applications of LLMs and generative AI Fine tune models with PEFT and LoRA to speed up training Expand your LLM toolbox with Retrieval Augmented Generation RAG techniques LangChain and LlamaIndex Purchase of the print or Kindle book includes a free eBook in PDF format Book Description Become an expert in Generative AI through immersive hands on projects that leverage today s most powerful models for Natural Language Processing NLP and computer vision Generative AI with Python and PyTorch is your end to end guide to creating advanced AI applications made easy by Raghav Bali a seasoned data scientist with multiple patents in AI and Joseph Babcock a PhD and machine learning expert Through business tested approaches this book simplifies complex GenAI concepts making learning both accessible and immediately applicable From NLP to image generation this second edition explores practical applications and the underlying theories that power these technologies By integrating the latest advancements in LLMs it prepares you to design and implement powerful AI systems that transform data into actionable intelligence You ll build your versatile LLM toolkit by gaining expertise in GPT 4 LangChain RLHF LoRA RAG and more You ll also explore deep learning techniques for image generation and apply style transfer using GANs before advancing to implement CLIP and diffusion models Whether you re generating dynamic content or developing complex AI driven solutions this book equips you with everything you need to harness the full transformative power of Python and AI What will you learn Grasp the core concepts and capabilities of LLMs Craft effective prompts using chain of thought ReAct and prompt query language to guide LLMs

toward your desired outputs Understand how attention and transformers have changed NLP Optimize your diffusion models by combining them with VAEs Build text generation pipelines based on LSTMs and LLMs Leverage the power of open source LLMs such as Llama and Mistral for diverse applications Who this book is for This book is for data scientists machine learning engineers and software developers seeking practical skills in building generative AI systems A basic understanding of math and statistics and experience with Python coding is required

Making Sense of Generative AI Dominik Hörndlein, 2025-01-21 Making Sense of Generative AI A Practical Guide for Business Leaders and Curious Minds Cut through the AI hype and transform your business with generative AI Written by an experienced AI practitioner this book cuts through complexity without sacrificing substance Gain the knowledge to make informed decisions about generative AI in your organization In a world where ChatGPT DALL-E Llama and other generative AI tools are reshaping business this practical guide helps you separate real opportunities from empty promises Making Sense of Generative AI provides a clear roadmap for understanding evaluating and implementing AI solutions that deliver genuine business value What You'll Learn How large language models AI image and video generators actually work Practical prompt engineering techniques for optimal AI outputs Setting up effective AI guardrails and safety measures Strategic frameworks for successful AI project implementation Future developments in artificial general intelligence and their business impact Real World Applications Across Industries Customer service automation with AI agents Document analysis and knowledge management Content creation for marketing and communications Personalized user experiences and engagement Includes Practical Resources Implementation frameworks and templates Risk assessment guidelines Business case calculation models Strategic planning tools for AI transformation Perfect For Curious minds seeking practical knowledge about AI technology Business leaders and executives planning AI initiatives Project managers implementing generative AI solutions Innovation teams exploring new AI capabilities Professionals wanting to understand AI's business implications

Artificial Intelligence in HCI Helmut Degen, Stavroula Ntoa, 2024-05-31 The three volume book set LNAI 14734 14735 and 14736 constitutes the refereed proceedings of 5th International Conference on Artificial Intelligence in HCI AI HCI 2024 held as part of the 26th International Conference HCI International 2024 which took place in Washington DC USA during June 29 July 4 2024 The total of 1271 papers and 309 posters included in the HCII 2024 proceedings was carefully reviewed and selected from 5108 submissions The AI HCI 2024 proceedings were organized in the following topical sections Part I Human centered artificial intelligence explainability and transparency AI systems and frameworks in HCI Part II Ethical considerations and trust in AI enhancing user experience through AI driven technologies AI in industry and operations Part III Large language models for enhanced interaction advancing human robot interaction through AI AI applications for social impact and human wellbeing

AI in Language Teaching, Learning, and Assessment Pan, Fang, 2024-02-12 The introduction of Artificial Intelligence AI has ignited a fervent academic discourse AI's role is as both a powerful ally and a potential adversary in education For instance ChatGPT is

a generative AI which mimics human conversation with impressive precision Its capabilities span the educational spectrum from answering questions and generating essays to composing music and coding Yet as with any innovation its advent has sparked a spirited academic dialogue AI in Language Teaching Learning and Assessment seeks to address these concerns with rigor and thoughtfulness It explores the undeniable drawbacks of AI in language education and offers strategic insights into their prevention It scrutinizes the resources and safeguards required to ensure the ethical and secure integration of AI in academic settings This book lays out the multifaceted benefits of incorporating AI into language teaching learning and assessment Its chapters dissect the transformative impact of AI on pedagogy teaching materials assessment methodologies applied linguistics and the broader landscape of language education development This book is a valuable resource for language learners educators researchers and scholars alike It beckons to those who are keen on exploring and implementing AI in education as well as AI developers and experts seeking to bridge the chasm between technology and language education
