The National Fire Protection Agency (NFPA) Standard 1710 sets a goal of a **5 minute and 20 second** response time for at least 90% of dispatched incidents. This goal includes:

- Call receipt and processing: One minute
- Turnout time: 80 seconds
- Travel time: 240 seconds

However, there is debate in the fire service over what exactly constitutes a response time. For example, the Pearland Fire Department sets benchmarks based on incident, risk, and geography, with a goal of hitting the goal time 90% of the time. Their benchmarks include:

- First arriving travel time: 4 minutes
- First arriving total time: 7.5 minutes
