Black Widows
Conrad Riker, If you've ever felt like progressive women are using emotional tactics to manipulate you, if you've ever been falsely accused of racism or privilege, if you've lost faith in modern society due to the rise of radical feminism, then this book is for you. Discover the mind games of hypersensitive women and how they weaponize false victimization to gain power. In this revealing book, you'll learn: How radical women use critical race theory to stifle free speech and divide society. The role of media in promoting misandrist activism and the effects on mental health. The dangers of cultural appropriation and how it prevents cultural exchange. The rise of radical women's groups and their impact on democracy and equality. How to identify and navigate the manipulative tactics of hypersensitive women. The reasons behind the self-perpetuating myth of hypersensitivity among modern women. The consequences of cultural marxism on Western society and its effect on individual freedoms. Strategies to counter the influence of radical women's activism in your own life. Don't be a victim anymore. If you want to gain a deep understanding of the manipulative tactics used by radical women and learn how to stand up for your rights, then buy this book today.

Artificial Unintelligence
Meredith Broussard, 2019-01-29. A software developer's misadventures in computer programming, machine learning, and artificial intelligence reveal why we should never assume technology always gets it right. In *Artificial Unintelligence*, Meredith Broussard argues that our collective enthusiasm for applying computer technology to every aspect of life has resulted in a tremendous amount of poorly designed systems. We are so eager to do everything digitally—hiring, driving, paying bills, even choosing romantic partners—that we have stopped demanding that our technology actually work. Broussard, a software developer and journalist, reminds us that there are fundamental limits to what we can and should do with technology. With this book, she offers a guide to understanding the inner workings and outer limits of technology and issues a warning that we should never assume that computers always get things right. Making a case against technochauvinism, the belief that technology is always the solution, Broussard argues that it's just not true that social problems would inevitably retreat before a digitally enabled Utopia. To prove her point, she undertakes a series of adventures in computer programming. She goes for an alarming ride in a driverless car, concluding the cyborg future is not coming any time soon; uses artificial intelligence to investigate why students can't pass standardized tests; deploys machine learning to predict which passengers survived the Titanic disaster and attempts to repair the U.S.

campaign finance system by building AI software If we understand the limits of what we can do with technology Broussard tells us we can make better choices about what we should do with it to make the world better for everyone
