We, the Robots? Simon Chesterman, 2021-08-05 Should we regulate artificial intelligence Can we From self driving cars and high speed trading to algorithmic decision making the way we live work and play is increasingly dependent on AI systems that operate with diminishing human intervention These fast autonomous and opaque machines offer great benefits and pose significant risks This book examines how our laws are dealing with AI as well as what additional rules and institutions are needed including the role that AI might play in regulating itself Drawing on diverse technologies and examples from around the world the book offers lessons on how to manage risk draw red lines and preserve the legitimacy of public authority Though the prospect of AI pushing beyond the limits of the law may seem remote these measures are useful now and will be essential if it ever does

INTELLIGENT RISK AND PROTECTION Revolutionizing Auto, Home, Life, and Travel Insurance with Artificial Intelligence and Machine Learning Sneha Singireddy, **Warranty and Preventive Maintenance for Remanufactured Products** Ammar Y. Alqahtani, Surendra M. Gupta, 2018-12-12 The exponential increase in the development of technology coupled with the customers immense desire to possess the newest technological products makes for truncated product lifespans which instigates a substantial upsurge in their rate of disposal Attempts have been made to establish specialized product recovery facilities with the intention of diminishing the volume of accumulated waste delivered to landfills using product recovery procedure such as remanufacturing The economic benefits produced by remanufacturing also portray the role of product recovery in a more attractive light The quality of a remanufactured product is uncertain for some consumers Therefore these consumers possess insecurities in deciding whether or not the remanufactured products will render the same expected performance This ambiguity regarding a remanufactured product could possibly result in the consumer deciding against its purchase With such consumer apprehension remanufacturers often seek market mechanisms that provide reassurance as to the stable durability that these products still maintain One strategy that the remanufacturers often use is the utilization of the premise of offering product warranties with preventive maintenance on their products This book is concerned with the practice and theory of warranty management and preventive maintenance particularly in relation to remanufactured

products warranties Models developed in this book can be used for making the right decisions in offering renewable nonrenewable one and two dimensional warranty policies and for managerial decision in considering maintenance contracts or outsourcing maintenance for remanufactured components and products Features Discusses a variety of warranty policies and preventive maintenance of remanufactured products first book to do so Presents mathematical models and applications for warranty policies using examples and simulation results Considers cost and optimization problems from the remanufacturer s and buyer s points of views Provides a foundation for academicians interested in building models in the area of warranty and preventive maintenance analysis of remanufactured products Offers the essential methodology needed by practitioners involved with warranty and preventive maintenance analysis along with extensive references for further research

Artificial Intelligence and Intellectual Property Jyh-An Lee,Reto Hilty,Kung-Chung Liu,2021-02-25 Artificial Intelligence AI has become omnipresent in today s business environment from chatbots to healthcare services to various ways of creating useful information While AI has been increasingly used to optimize various creative and innovative processes the integration of AI into products services and other operational procedures raises significant concerns across virtually all areas of intellectual property IP law While AI has drawn extensive attention from IP experts globally this is the first book providing a broad and comprehensive picture from the perspectives of the very nature of AI technology its commercial implications its interaction with different kinds of IP IP administration software and data its social and economic impact on the innovation policy and ultimately AI s eligibility as a legal entity
