Clifford, 2021-12-06 In *The China Paradox At the Front Line of Economic Transformation* Harvard University based historian of modern China and business strategist Dr Paul G Clifford documents the twists and turns of China's dramatic and unforeseen rise over the last four decades He sheds light on the delicate and fragile balance of forces at the heart of the success of China's hybrid model explaining how the ruling Communist Party boldly led the nation's economic reforms as the surest way to preserve its grip on political power Five years after this book was first published much has changed within China and in its relationship with the world This second edition provides extensive fresh new material It explains how China has raised its game moving from a catch up mode to technological innovation in some areas while still languishing in technology dependence in other respects Earlier China had shown signs that its driving spirit was faltering with its sails flapping Under Xi Jinping renewed energy has been injected But at the same time Xi and his party have strongly reinforced their control across society and the economy posing the question

of whether Xi's New Era in fact marks a retreat from the reforms. This second edition contains two new chapters. One profiles Huawei, a national champion in advanced technology. Another focuses on China's frictions with the world, which have been fueled by a perception that its technology progress threatens US global dominance coupled with China's human rights record. In addition, against a background of the challenges faced by Alibaba and other firms, there is analysis of this watershed in China's private sector's autonomy. There is also extensive new insight into Xi Jinping's rule. As it celebrates its 100th anniversary in 2021, the Chinese Communist Party displays strong optimism over its continued governance of China. But that should not mask the longer term risks to China's development and stability if its hybrid model continues to unravel as reforms are abandoned in favor of heightened autocracy. *Flipphonia* Jason O'Neil, 2022-12-18

In this novel, an American non-profit company initiates a national movement to heal the youth's addiction to mobile social media like smart phones. Voice Synthesis Inc. VSI, based in Alexandria, Virginia, was founded by Matt and Heather Flynn, billionaires from their Turbopod T-Pod vehicles sold around the world. The couple does research to determine that the addiction starts at age ten and is a primary culprit in the dramatic reduction of the Work Ethic in America. The book provides alarming statistics as VSI's employees focus on the problem at home, in the schools, in retail businesses, in the government, the military, and board rooms. It becomes clear to the reader that the social media devices greatly contribute to dumbing of citizens, ripe for control by a Socialist government. The reader follows VSI as it enlists a well-known company to apply artificial intelligence to voice synthesis systems to create a useful Flip Phone for the youth. FLIPA can access communications but not the Internet and streaming video. Nationally known cyber gurus who formed a company called Padlockers create a computer E-Worm which debilitates the production of popular smart phones in China. At the same time, the government provides programs attractive for companies to bring back the production of the devices to America. The story ends with a realistic hope for the future as the simple FLIPA wins over legions of youth, one Flip Phone at a time. *Seeking the Truth from Mobile Evidence* John Bair, 2017-11-17
