current situation within the Sungai Selangor watershed Increasing pressures on land development is a major factor that causes land use conflicts in the watershed Spatial environmental governance should improve collaboration and connections between citizens and decision makers at the watershed scale Many issues within the economic social or environmental realm necessitate an understanding of the spatial context within which such forces operate The book is organized in ten chapters each chapter being devoted towards addressing particular issues considered prevalent or outstanding within the community living within the watershed Although the book has been written in an academic manner it should also appeal to the general public and students in higher education institutions as it relates to topical issues Beginner researchers may find that the discussion of various issues within a location specific context might spark off their interest to begin their own research on particular aspects that appeal to their own area of expertise
