There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this, but none which acknowledges Information and Communication Technologies (ICT) as a mechanism of doing so, despite being an emerging area of research. ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that facilitates data processing, information sharing, communication and the ability to search and select from an existing range of products and services for an organisation's benefits. Despite the symbiotic relationship which exists between ICT and sustainable tourism, there has been little research which has considered how the use of such technology can be used to make sustainable tourism development a more workable
