

SCIENCE READING COMPREHENSION

Science Experiments

Once upon a time, in a small town nestled between rolling hills and lush green forests, there lived a curious young girl named Lily. Lily was fascinated by the wonders of science and spent countless hours conducting experiments in her backyard laboratory.

One sunny morning, Lily decided to test out her latest experiment - a homemade volcano. With a mixture of baking soda, vinegar, and red food coloring, she created a bubbling lava effect that erupted from the top of the volcano model.
