This edited volume examines the transformative impact of AI technologies on global healthcare systems with a focus on enhancing efficiency and accessibility. The content provides a comprehensive exploration of the principles and practices required to scale AI applications in healthcare, addressing areas such as diagnosis, treatment, and patient care. Key topics include data scalability, model deployment, and infrastructure design, highlighting the use of microservices, containerization, cloud computing, and big data technologies in building scalable AI systems. Discussions cover advancements in machine learning, models, distributed processing, and transfer learning, alongside critical considerations such as continuous integration, data privacy, and ethics. Real-world case studies depict both the successes and challenges of implementing scalable AI across various healthcare environments, offering valuable insights for future advancements. This volume serves as a practical and theoretical guide for healthcare professionals, AI researchers, and technology enthusiasts seeking to develop or expand on AI-driven healthcare solutions to address global health challenges effectively.

Sustainable Smart Homes and Buildings with Internet of Things Pramod Singh Rathore, Abhishek Kumar, Surbhi Bhatia, Arwa Mashat, Thippa Reddy Gadekal, 2024-11-19. Written and edited by a team of experts in the field, this exciting new volume explores the real-world applications and methods for using Internet of Things (IoT) to make homes and buildings smart and sustainable and to continue working toward a greener world. **Sustainable Smart Homes and Buildings with Internet of Things (IoT)** is a book that explores the integration of renewable energy sources and IoT technology in the design and management of smart homes and buildings. The book covers various topics related to the subject, including energy efficiency, real-time monitoring, control, and optimization of renewable energy sources, smart grid integration, energy storage systems, and microgrids. The book explains how IoT technology can be used to collect data from various sensors and devices installed in smart homes and buildings to create a real-time monitoring and control system for renewable energy sources, which can help optimize energy usage and reduce waste. It also discusses the challenges and opportunities associated with the integration of renewable energy sources in smart homes and buildings and how these challenges can be addressed through the use of IoT technology. The book is intended for architects, engineers, building managers, energy professionals, and researchers interested in the design and management of sustainable smart homes and buildings. It provides practical insights, case studies, and examples that illustrate the benefits of using renewable energy sources and IoT technology to create energy-efficient, environmentally friendly, and comfortable living spaces.

Conference on Advanced Intelligent Systems for Sustainable Development (AI2SD 2024) Mostafa Ezziyani, Janusz Kacprzyk, Valentina Emilia Balas, 2025-07-19 This book provides a dynamic platform for exploring groundbreaking advancements in intelligent systems for sustainable development. It offers readers access to the latest technologies and innovative solutions that address global challenges. Bringing together leading academics, pioneering researchers, and industry leaders fosters knowledge exchange across various fields such as health, education, agriculture, energy, and security. It enables readers to gain valuable insights, build strategic partnerships, and contribute to shaping a more sustainable future. This book bridges scientific research with practical applications and is ideal for researchers, practitioners, and decision makers driving progress across multiple disciplines.

Low-Power Wide Area Network for Large Scale Internet of Things Mariyam Ouaisa, Mariya Ouaisa, Inam Ullah Khan, Zakaria Boulouard, Junaid Rashid, 2024-04-11 This book presents a comprehensive exploration of LPWANs, delving into their fundamental concepts, underlying technologies, and the multifaceted challenges they tackle. This book recognizes that LPWANs don't operate in isolation; they are intimately intertwined with Artificial Intelligence and Machine Learning (AI/ML) technologies, which play a pivotal role in optimizing LPWAN performance and capabilities. The book is a collection of original contributions regarding air interface transmission technologies and novel network architectures such as network slicing, cloud fog edge computing, ad hoc networks, and software defined network. Also, this book provides a guide for researchers of IoT applications to choose suitable LPWAN technologies and describe the design aspects, network architectures, security issues, and challenges. Features: Explains machine learning algorithms onto low power wide area network sensors for compressed communications. Illustrates wireless based Internet of Things networks using low power wide area networks technology for quality air. Presents cognitive Internet of Things networks using wireless communication and low power wide area network technologies for Ad Hoc networks. Discusses a comprehensive study of low power wide area networks for flying Ad Hoc networks. Showcases the study of energy efficient techniques aided by low power wide area network technologies for the Internet of Things networks. The text is aimed at senior undergraduate, graduate students, and academic researchers in the fields of electrical engineering, electronics, and communication engineering, computer engineering, and information technology.

Ethics of Artificial Intelligence Bernd Carsten Stahl, Doris Schroeder, Rowena Rodrigues, 2022-11-01 This open access collection of AI ethics case studies is the first book to present real life case studies combined with commentaries and strategies for overcoming ethical challenges. Case studies are one of the best ways to learn about ethical dilemmas and to achieve insights into various complexities and stakeholder perspectives. Given the omnipresence of AI ethics in academic policy and media debates, the book will be suitable for a wide range of audiences from scholars of different disciplines (e.g. AI science, ethics, politics, philosophy, economics) to policy makers, lobbying NGOs, teachers, and the educated public.
