### **Managing Electronic Media** Joan Van Tassel, 2012-09-10

This college-level media management textbook reflects the changes in the media industries that have occurred in the past decade. Today's managers must address new issues that their predecessors never faced: the threats of professional piracy and casual copying of digital media products to global networks on demand, consumption, and changing business models. The book explains the new vocabulary of media moguls, such as bandwidth, digital rights management, customer relations management, distributed work groups, centralized broadcast operations, automated playlists, server-based playout, repurposing, mobisodes, TV to DVD, and content management. The chapters logically unfold the ways that managers are evolving their practices to make content market it and deliver it to consumers in a competitive global digital marketplace. In addition to media companies, this book covers management processes that extend to all content-producing organizations because today's students are as likely to produce high-quality video and Web video for ABC Computer Sales as they are for the ABC Entertainment Television Network.
