Why Wellness Sells Colleen Derkatch, 2022-12-13 How and why the idea of wellness holds such rhetorical and harmful power In *Why Wellness Sells* Colleen Derkatch examines why the concept of wellness holds such rhetorical power in contemporary culture Public interest in wellness is driven by two opposing philosophies of health that cycle into and amplify each other restoration where people use natural health products to restore themselves to prior states of wellness and enhancement where people strive for maximum wellness by optimizing their body's systems and functions *Why Wellness Sells* tracks the tension between these two ideas of wellness across a variety of sources including interviews popular and social media advertising and online activism Derkatch examines how wellness manifests across multiple domains where being well means different things ranging from a state of pre illness to an empowered act of good consumer citizenship from physical or moral purification to sustenance and care and from harm reduction to optimization Along the way Derkatch demonstrates that the idea of wellness may promise access to the good life but it serves primarily as a strategy for coping with a devastating and overwhelming present Drawing on scholarship in the rhetoric of health and medicine the health and medical humanities and related fields Derkatch offers a nuanced account of how language belief behavior experience and persuasion collide to produce and promote wellness one of the most compelling and harmful concepts that govern contemporary Western life She explains that wellness has become so pervasive in the United States and Canada because it is an ever moving and thus unachievable goal The concept of wellness entrenches an individualist model of health as a personal responsibility when collectivist approaches would more readily serve the health and well being of whole populations

The Materiality of Narrative Dynamics Stefan Iversen,Evan Van Tassell,2025-06-02 The dynamic nature of storytelling has long been one of the major concerns of narrative research but relatively little scholarship has engaged with the relationship between storytelling dynamics and the underlying material forms of cultural texts This volume seeks to remedy this by asking questions such as How might the affordances of new media guide audience reception in subtle ways How might the dynamism of legacy media be better recognized when examined through a multimedial lens How do the physical processes of production define the horizons of both authorial activity and audience response The insight that drives these investigations is two fold first that functions and effects of narratives are deeply intertwined with material forces of production distribution and reception and second that an analysis of any specific narrative must include attention to these material matters and how they affect the

unfolding of stories over time The chapters in this collection explore interplays between material forces and narrative dynamics across a range of genres and intellectual arenas In doing so they both fill gaps in current methodological frameworks and call attention to the many gaps that are yet to be filled
