Handbook on the Economics of Women in Sports Michael Leeds, Eva Marikova Leeds, 2013-01-01 In the Handbook on the Economics of Women in Sports Leeds and Leeds put together an impressive list of heavy hitters in the sociology and economics literature on sports to produce a tour de force volume The entire spectrum of international perspectives is covered from US Korean and Australian sports to world competition at the highest level of the Olympics and international championships Whether your interest is attendance at women's events performance and rewards in women's pro sports gender issues in US college sports or international performance and how women compete this handbook is a must read for any serious fan and for all serious scholars interested in the impacts of being female on sports performance and competitiveness Rodney Fort University of Michigan US Leeds and Leeds have filled a gaping hole in sports economics with this revealing collection of essays The economics of women in sports has been too long neglected By covering everything from women as sports spectators to women as participants in individual and team sports at the collegiate and professional levels to women's sports internationally Title IX and women's differential response to incentives this volume not only demonstrates that there is much fertile ground to be studied but also that the subject matter is both interesting and important Andrew Zimbalist Smith College US Women's sports have received much less attention from economists than from other social scientists This Handbook fills that gap with a comprehensive economic analysis of women's sports It also analyzes how the behavior and treatment of female athletes reflect broad economic forces Contributors to this volume use current theoretical models and econometric tools to examine the legal social and economic forces that affect the experiences of female athletes They address such traditional topics as discrimination against female athletes and coaches and the effect of athletic events on the economies of host countries They also apply theory and estimation to new settings such as how women respond to tournaments in skiing and figure skating or how the growing dominance of Korean women on the LPGA tour is a form of immigration This groundbreaking book is a valuable resource for professors students and researchers in sports economics sports management and women's studies

Undergraduate Student Engagement Zhe Zhang, Olwen McNamara, 2018-07-31 This book focuses on undergraduate student engagement in China and the UK It offers an innovative perspective on this aspect which although pervasive is not always acknowledged by its users to be complex and multidimensional in nature firmly rooted in cultural social and disciplinary norms and difficult to measure Competition within the global higher education market has become increasingly intense amongst universities and the higher education sector in China currently the largest source of international students is beginning to compete strongly for its home market Against this consumerist background student engagement with its close relation to positive learning outcomes is increasingly receiving attention from higher education managers and researchers who seek to improve the quality of their products The research

study on which the book is based draws on three courses two in China and one in the UK It offers a binary perspective across two very different cultures Western and Confucian and two very different subject areas Chinese language and mathematics The study employs a mixed methods design and develops a conceptual framework derived from statistical and thematic analysis An original theoretical lens combining a bioecological perspective Bronfenbrenner and a sociocultural one Holland et al s *Figured Worlds* adds further interpretive power to help understand the construct of student engagement

The Impact of Higher Education Ranking Systems on Universities Kevin Downing,Petrus Johannes Loock,Sarah Gravett,2021-04-05 This book written by three generations of rankings academics with considerable experience from three very different regions of the globe lifts the lid on the real impact of higher education ranking systems HERS on universities and their stakeholders It critically analyses the criteria that make up the Big Three global ranking systems and using interviews with senior administrators academics and managers discusses their impact on universities from four very different continents Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS Despite all the opinions and arguments about the legitimacy of the rankings as a construct it seems experts agree that they are here to stay The question therefore seems to be less about whether or not universities should be compared and ranked but the manner in which this is undertaken Delivering a fresh perspective on global rankings this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions South Africa the Arab region South East Asia and Australia It will appeal to any academic student university administrator or governing body interested in or affected by global higher education ranking systems

Meaning and Power in a Southeast Asian Realm Shelly Errington,2014-07-14 The ruler in the Indic States of Southeast Asia was seen not as the head of state but as the center or navel of the world Like polities persons and houses were and are viewed as centered spaces locations where spiritual potency can gather Shelly Errington explores the politics of constituting and maintaining such centered socio political spaces in a former Indic State called Luwu which lies in South Sulawesi Celebes Indonesia The meaning of political life and the ways its cultural forms were and are sustained depend on locally construed ideas of power or spiritual potency and the person which the author explores in detail She views the polity neither as a frame in which political actors pursue advantage nor as a structure for extracting wealth but as a hierarchical system of signs ultimately backed by force but force

which was not fully centralized and whose import must be understood within ideas about spiritual potency widespread in the region Although focused on Luwu the book's theoretical scope is wide and it ranges comparatively over a broad geographical area making a contribution to ethnographic historical and regional studies as well as to the study of politics in nonsecular societies Part One traces how the person the house and the polity are constituted symbolically in everyday practices as centered spaces Part Two examines how centers can be de centered while Part Three explores the structure that tended to hold centers together in Luwu and other Indic States The introduction and the three conclusions each of the three being broader than the last in comparative scope locate the author's views with respect to other current theoretical approaches to power and culture Originally published in 1989 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Global University Rankings T. Erkkilä, 2013-09-26 Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies disciplinary traditions and higher education institutions The first global university rankings were published less than a decade ago but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education The rankings have portrayed European academic institutions in a varying light There is intense reflexivity over the figures leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe

Global University Rankings and the Mediatization of Higher Education Michelle Stack, 2016-04-12 Higher Education Institutions simultaneously critique and participate in national and international rankings of universities However this creates a difficult situation since if universities do participate in rankings they acquiesce to a system based in media logics that has little to do with academic norms of research If they do not participate in the rankings they risk losing public funding students and donors in an increasingly competitive and globalized environment This book delves into the influence of journalists business tycoons and multinational corporations in defining what world class is and how it will be measured Rankings provide us with a rich study for understanding how universities define deploy and manage their assets and liabilities in a mediatized globalized economy
