Sleep Hacks Today:

Technosleep Catherine Coveney, Michael Greaney, Eric L. Hsu, Robert Meadows, Simon J. Williams, 2023-06-25 This book draws on a variety of substantive examples from science technology medicine literature and popular culture to highlight how a new technoscientifically mediated and modified phase and form of technosleep is now in the making in the global north at least and to discuss the consequences for our relationships to sleep the values we accord sleep and the very nature and normativities of sleep itself The authors discuss how technosleep at its simplest denotes the coming together or entanglements of sleep and technology and sensitizes us to various shifts in sleep technology relations through culture time and place In doing so it pays close attention to the salience and significance of these trends and transformations to date in everyday night life their implications for sleep inequalities and the related issues of sleep and social justice they suggest

222 Ways to Trick Yourself to Sleep Kim Jones, 2019-03-14 Wide ranging backed by science and research informative and easy to understand this is a great book for the sleep deprived Lisa Artis The Sleep Council When was the last time you had a proper night's sleep In today's fast paced non stop world research by the UK's Sleep Council has found that almost a third of us don't get enough sleep most nights Insomnia can wreak havoc on everyday life leaving us feeling exhausted irritable and unwell Lack of sleep has also been linked to a whole host of long term chronic conditions including Type 2 diabetes heart disease stroke high blood pressure obesity and depression But don't despair help is at hand This book is packed with easy to read and simple to follow tips as well as some weird and wonderful tricks all gathered from expert scientific research that will help you fall asleep and stay asleep You may be surprised to learn that everything from having a purpose in life to warming your feet from what you eat through the day to how you breathe from how much time you spend outdoors to reframing your thoughts and mindset can all help you get a better night's rest A good night's sleep can help change your life for the better and this book will help you to achieve it Sleep Hacks Keith Barry, 2024-09-19 Harness the power of your mind for better sleep Renowned brain hacker Keith Barry has spent his career mastering the science of hypnosis and sleep aiding countless individuals in overcoming damaging sleep patterns while establishing new beneficial habits Now he wants to help you In this transformative programme Keith unveils his unique approach integrating hypnosis neuroscience and brain hacking techniques to assist anyone who is struggling to attain deep revitalising sleep With this truly life changing book you will not only understand the mechanics of your sleep patterns but will also possess the tools to rewire your brain for a restful and rejuvenating night's sleep Better Sleep, Tonight 7 Proven Hacks to Fall Asleep in 15 Minutes or Less Grandpa B. , 2025-09-11 Better Sleep Tonight 7 Proven Hacks to Fall Asleep in 15 Minutes or Less Are you tired of tossing and turning at 2 a.m Do racing thoughts keep you awake long after your body begs for rest You're not alone and you're not broken At 85 years old author Grandpa B has spent decades testing and refining simple practical methods to calm the mind relax the body and invite restful sleep This mini book is the first in the series Grandpa B's Life Hacks a collection of

Current Research on Sleep and Dreams United States. Public Health Service, Gay Gaer Luce, 1966 This monograph was stimulated by the extraordinary growth now apparent in an area generally identified as sleep and dream research for this recent concentration of scientific effort offers a singular example of the power that basic research can exert in penetrating the problems of mental health and illness In the past year alone the National Institute of Mental Health supported over 60 projects related in whole or in part to studies of sleep and dreams with awards totaling over 2 million The work of many of these NIMH investigators is included in this summary which extends beyond the Institute s program insofar as necessary to indicate the major trends of work in the area The report cannot of course encompass the classical studies already summarized in published literature nor even provide comprehensive survey of present day sleep research for although much of the scientific data on sleep have been generated during the last dozen years significant references in this field now number in the many thousands The mosaic of disciplines contributing to the study of sleep contains such diverse fields as psychiatry and mathematics psychology and biochemistry physiology and anthropology Nevertheless ferment about the subject matter and a spirit of cooperation across traditional disciplinary lines have made it possible to knit together data that might otherwise have lain unrelated in a variety of laboratories During the past year individual summaries of many of the projects cited here were distributed to scientists working in the field of sleep and dreams Many of the recipients felt that up to date reports especially in a field of such dynamic activity represented a unique solution to the problem of scientific information exchange Such communication it was felt provided a quick look at work in progress that might prevent duplication of effort and stimulate pertinent contacts among scientists thus aiding them in their work It is hoped that this monograph will be a further part of that process Foreword
