College

Andrew Delbanco, 2023-04-18 The strengths and failures of the American college and why liberal education still matters As the commercialization of American higher education accelerates more and more students are coming to college with the narrow aim of obtaining a preprofessional credential The traditional four year college experience an exploratory time for students to discover their passions and test ideas and values with the help of teachers and peers is in danger of becoming a thing of the past In College prominent cultural critic Andrew Delbanco offers a trenchant defense of such an education and warns that it is becoming a privilege reserved for the relatively rich In describing what a true college education should be he demonstrates why making it available to as many young people as possible remains central to America s democratic promise In a brisk and vivid historical narrative Delbanco explains how the idea of college arose in the colonial period from the Puritan idea of the gathered church how it struggled to survive in the nineteenth century in the shadow of the new research universities and how in the twentieth century it slowly opened its doors to women minorities and students from low income families He describes the unique strengths of America s colleges in our era of globalization and while recognizing the growing centrality of science technology and vocational subjects in the curriculum he mounts a vigorous defense of a broadly humanistic education for all Acknowledging the serious financial intellectual and ethical challenges that all colleges face today Delbanco considers what is at stake in the urgent effort to protect these venerable institutions for future generations

Higher Education in the Global Age Daniel Araya, Peter Marber, 2013-11-20 Discussions on globalization now routinely

focus on the economic impact of developing countries in Asia Africa the Middle East the former Soviet Union and Latin America Only twenty five years ago many developing countries were largely closed societies Today the growing power of emerging markets is reordering the geopolitical landscape On a purchasing power parity basis emerging economies now constitute half of the world s economic activity Financial markets too are seeing growing integration Asia now accounts for 13 of world stock markets more than double that of just 15 years ago Given current trajectories most economists predict that China and India alone will account for half of global output by 2050 almost a complete return to their positions prior to the Industrial Revolution How is higher education shaping and being shaped by these massive tectonic shifts As education rises as a geopolitical priority it has converged with discussions on economic policy and a global labor market As part of the Routledge Studies in Emerging Societies series this edited collection focuses on the globalization of higher education particularly the increasing symbiosis between advanced and developing countries Bringing together senior scholars journalists and practitioners from around the world this collection explores the relatively new and changing higher education landscape

Limits to Stakeholder Influence Michael L. Barnett,2018 In business does it pay to be good Drawing from two decades of published conceptual and empirical scholarship this book outlines the mechanisms of the business case for corporate social responsibility and demonstrates the conditions that cause good corporate acts to succeed or fail in turning a profit Central to the explanation is the role of stakeholders who are portrayed as agents who can turn corporate good into gold but lack the capacity to do so consistently This book takes a critical perspective noting significant limits on the ability of stakeholders to reward good corporate behavior and rein in bad corporate acts It concludes with several ways that scholars can improve this important and popular research topic

University Rankings Jung Cheol Shin,Robert K. Toutkoushian,Ulrich Teichler,2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their

resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

The McDonaldization of Society George Ritzer, 2018-01-12 The author is a proud sponsor of the 2020 SAGE Keith Roberts Teaching Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop The book that made McDonaldization part of the lexicon of contemporary sociological theory read by hundreds of thousands of students is now in its Ninth Edition George Ritzer's seminal work of critical sociology The McDonaldization of Society continues to stand as one of the pillars of modern day sociological thought Building on the argument that the fast food restaurant has become the model for the rationalization process today this book links theory to contemporary life in a globalized world and resonates with students in a way that few other books do Ritzer opens students eyes to many current issues and shows how McDonaldization's principles apply to other settings especially in the areas of consumption and globalization This new edition has been significantly reoriented to reflect our experience of McDonaldization in the world of online consumption New to this Edition Examines how retailers like Amazon represent a new era of datafication the transformation of vast amounts of information into quantifiable data Discusses how the digital world has almost unlimited potential to turn consumers into prosumers doing volunteer work formerly done by paid employees This edition is more streamlined than previous editions to sharpen its argument and message and make it more useable as a secondary reading in a wide range of courses
