A Practical Guide to Gender Diversity for Computer Science Faculty Diana Franklin, 2022-05-31 Computer science faces a continuing crisis in the lack of females pursuing and succeeding in the field. Companies may suffer due to reduced product quality, students suffer because educators have failed to adjust to diverse populations, and future generations suffer due to a lack of role models and continued challenges in the environment. In this book, we draw on the latest research in sociology, psychology, and education to first identify why we should be striving for gender diversity beyond social justice, refuting misconceptions about the differing potentials between females and males. We then provide a set of practical types with brief motivations for improving your work with undergraduates taking your courses. This is followed by an in-depth discussion of the research behind the tips, presenting obstacles that females face in a number of areas. Finally, we provide tips for advising undergraduate independent projects or graduate students supporting female faculty and initiatives requiring action at the institutional level, department or above. Design a Better Business Patrick van der Pijl, Justin Lokitz, Lisa Kay Solomon, 2016-09-20

This book stitches together a complete design journey from beginning to end in a way that you've likely never seen before, guiding readers step by step in a practical way from the initial spark of an idea all the way to scaling it into a better business. Design a Better Business includes a comprehensive set of tools, over 20 total, and skills that will help you harness opportunity from uncertainty by building the right team and balancing your point of view against new findings from the outside world. This book also features over 50 case studies and real-life examples from large corporations such as ING Bank, Audi, Autodesk, and Toyota Financial Services, to small startups, incubators, and social impact organizations, providing a behind-the-scenes look at the best practices and pitfalls to avoid. Also included are personal insights from thought leaders such as Steve Blank on innovation, Alex Osterwalder on business models, Nancy Duarte on storytelling, and Rob Fitzpatrick on questioning, among others.

The Value Flywheel Effect David Anderson, 2022-11-08 It's no secret that technology is moving faster than ever, but current business IT strategies are not working. To survive the next wave of transformation, the relationship between businesses and technology must evolve. In The Value Flywheel Effect, David Anderson enables leaders to create an adaptive organization built upon embracing strategic thinking, team focus, and reduced time to value to drive business results. The Value Flywheel Effect is a technique already being used by next-generation leaders and companies to succeed in the modern competitive landscape. Combining the power derived from the Value Flywheel and the situational clarity provided by Wardley Mapping, organizations are able to sense and respond to change easily, navigating the rough waves ahead, including migrating to the cloud and serverless. Every company that uses technology must act differently from the companies of yesterday. In The Value Flywheel Effect, David Anderson shows organizations how to understand and utilize the socio-technical intersection between business technology and people, giving your organization the edge it needs to navigate future challenges and build maximum situational awareness. Journal of Interdisciplinary

Science Topics, Volume 7 Cheryl Hurkett, 2018-05-18 The Journal of Interdisciplinary Science Topics JIST forms part of the Interdisciplinary Research Journal module in the third year of both the BSc and MSci Natural Science degrees It is intended to provide students with hands on experience of and insight into the academic publishing process The activity models the entire process from paper writing and submission refereeing other students papers sitting on the editorial board that makes final decisions on the papers to finally publishing in an online journal This book is a compilation of the papers written by undergraduate students that were published during the 2017 2018 academic year

Intellectual Property Valuation and Innovation Ruth Taplin, 2013-10-15 With the recent global economic crisis attitudes and practices in relation to intellectual property valuation are changing as exemplified by the dichotomy explained in this book which makes it unique While there has been a move towards global harmonisation in terms of valuation of both tangible and intangible assets that are based on innovation there is also a tendency against global harmonisation because of cultural attitudes and practices of different countries This can be seen most acutely in relation to intellectual property valuation in Asia especially East Asia which often differs from the West's perception of valuation The book is written by experts in intellectual property valuation and innovation who are mainly practitioners covering innovators marketers accountants social innovators and business and management academics The breadth and practitioner background of most of the contributors make the material relevant to those involved in valuation economics business management accounting and finance law and maritime insurance This book takes an interdisciplinary approach that cross cuts all the above mentioned disciplines and takes the understanding of intellectual property valuation to a new level

Cloud Native Java Josh Long, Kenny Bastani, 2017-08-11 What separates the traditional enterprise from the likes of Amazon Netflix and Etsy Those companies have refined the art of cloud native development to maintain their competitive edge and stay well ahead of the competition This practical guide shows Java JVM developers how to build better software faster using Spring Boot Spring Cloud and Cloud Foundry Many organizations have already waded into cloud computing test driven development microservices and continuous integration and delivery Authors Josh Long and Kenny Bastani fully immerse you in the tools and methodologies that will help you transform your legacy application into one that is genuinely cloud native In four sections this book takes you through The Basics learn the motivations behind cloud native thinking configure and test a Spring Boot application and move your legacy application to the cloud Web Services build HTTP and RESTful services with Spring route requests in your distributed system and build edge services closer to the data Data Integration manage your data with Spring Data and integrate distributed services with Spring's support for event driven messaging centric architectures Production make your system observable use service brokers to connect stateful services and understand the big ideas behind continuous delivery
