Progress in Advanced Computing and Intelligent Engineering Chhabi Rani Panigrahi, Bibudhendu Pati, Binod Kumar Pattanayak, Seeven Amic, Kuan-Ching Li, 2021-04-15 This book focuses on theory practice and applications in the broad areas of advanced computing techniques and intelligent engineering This book includes 74 scholarly articles which were accepted for presentation from 294 submissions in the 5th ICACIE during 25 27 June 2020 at Universit des Mascareignes UdM Mauritius in collaboration with Rama Devi Women s University Bhubaneswar India and S O A Deemed to be University Bhubaneswar India This book brings together academicians industry persons research scholars and students to share and disseminate their knowledge and scientific research work related to advanced computing and intelligent engineering It helps

to provide a platform to the young researchers to find the practical challenges encountered in these areas of research and the solutions adopted The book helps to disseminate the knowledge about some innovative and active research directions in the field of advanced computing techniques and intelligent engineering along with some current issues and applications of related topics **16th International Conference on Information Technology-New Generations (ITNG 2019)**

Shahram Latifi,2019-05-22 This 16th International Conference on Information Technology New Generations ITNG continues an annual event focusing on state of the art technologies pertaining to digital information and communications The applications of advanced information technology to such domains as astronomy biology education geosciences security and health care are among topics of relevance to ITNG Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help the information readily flow to the user are of special interest Machine Learning Robotics High Performance Computing and Innovative Methods of Computing are examples of related topics The conference features keynote speakers the best student award poster award service award a technical open panel and workshops exhibits from industry government and academia **General-Purpose Graphics Processor Architecture** Tor M. Aamodt,Wilson Wai Lun Fung,Timothy G. Rogers,2018-05-21 Originally developed to support video games graphics processor units GPUs are now increasingly used for general purpose non graphics applications ranging from machine learning to mining of cryptographic currencies GPUs can achieve improved performance and efficiency versus central processing units CPUs by dedicating a larger fraction of hardware resources to computation In addition their general purpose programmability makes contemporary GPUs appealing to software developers in comparison to domain specific accelerators This book provides an introduction to those interested in studying the architecture of GPUs that support general purpose computing It collects together information currently only found among a wide range of disparate sources The authors led development of the GPGPU Sim simulator widely used in academic research on GPU architectures The first chapter of this book describes the basic hardware structure of GPUs and provides a brief overview of their history Chapter 2 provides a summary of GPU programming models relevant to the rest of the book Chapter 3 explores the architecture of GPU compute cores Chapter 4 explores the architecture of the GPU memory system After describing the architecture of existing systems Chapters ref ch03 and ref ch04 provide an overview of related research Chapter 5 summarizes cross cutting research impacting both the compute core and memory system This book should provide a valuable resource for those wishing to understand the architecture of graphics processor units GPUs used for acceleration of general purpose applications and to those who want to obtain an introduction to the rapidly growing body of research exploring how to improve the architecture of these GPUs
