Capitalizing Your Technology to Disrupt and Dominate Your Markets Aviv Ben-Yosef, 2023-06-21 Every business today has some technology as part of its strategy Inevitably it is becoming harder for many CEOs to effectively lead their R D efforts at the same time that their investment in tech keeps growing Even startup founders can find themselves flustered when trying to understand whether a particular issue is genuinely impossible to solve getting the team to provide reliable estimates and having their top tech leaders speak in plain words as opposed to jargon This book helps them bridge the culture gap between the C suite and R D covers frequent tech related decisions and issues and provides a way to unlock tech as an offensive weapon and a strategic differentiator To create an environment where technology is not merely an execution mechanism but acts as a fulcrum for strategic opportunities one must put a particular leadership team in place and equip them with digital literacy Based on the author s experience and discussions with hundreds of executives worldwide he short circuits common failure patterns and enables nontechnical senior leaders to act with more certainty and clarity regarding their tech efforts Startups and tech efforts initiated without enough understanding of the technical aspects often have to be scrapped and started from scratch within 18 months This can make or break certain endeavors and as the author has helped his clients avoid these problems the book will help the readers establish a sturdy foundation to work from This book covers clear guidelines for founders executives and senior leaders that are not tech savvy These include establishing a tech organization making the first key hires assessing the relevance and risk involved in different options and creating a healthy

connection as opposed to a tech silo On top of that it will include lessons and case studies that stem from experience in the Startup Nation such as how to inject chutzpah into daily discussions and create an organization with habitual innovation
