Algebra William G. McCallum, Eric Connally, Deborah Hughes-Hallett, 2014-11-25 Algebra Form and Function was designed based on the fundamental goal for a student to foster understanding of algebraic structure that is an understanding of how the arrangements of symbols allows us to predict for example the behavior of a function or the number of solutions to an equation Mastering algebraic structure enables students to read algebraic expressions and equations in real life contexts not just manipulate them and to choose which form or which operation will best suit the context It facilitates being able to translate back and forth between symbolic graphical numerical and verbal representations By balancing practice in manipulation and opportunities to see the big picture Algebra Form and Function offers a way for teachers to help students achieve real mastery of algebra

However the book is not just an account of how an industry came off the rails but also a passionate call to action on how to get it back on track

Gavet a leading technology executive and former CEO of Ozon an executive vice president at Priceline Group and chief operating officer of Compass formulates a clear call to action for industry leaders board members employees and consumers users to drive the change necessary to create better more sustainable businesses and the steps Western governments are likely to take should tech leaders fail to do so

Steps that include reformed tax codes reclassification of platforms as information companies new labor laws and algorithmic transparency and oversight

Trampled by Unicorns exploration of the promise and dangers of technology is perfect for anyone with an interest in entrepreneurship tech and global commerce and a hope of technology's all empowering prospect

An illuminating book full of insights

Trampled by Unicorns describes a realistic path forward even as it uncovers and explains the errors of the past
