AI for Arts Niklas Hageback, Daniel Hedblom, 2021-08-25 AI for Arts is a book for anyone fascinated by the man machine connection an unstoppable evolution that is intertwining us with technology in an ever greater degree and where there is an increasing concern that it will be technology that comes out on top Thus presented here through perhaps its most esoteric form namely art this unfolding conundrum is brought to its apex What is left of us humans if artificial intelligence also surpasses us when it comes to art The articulation of an artificial intelligence art manifesto is long overdue so hopefully this book can fill a gap that will have repercussions not only for aesthetic and philosophical considerations but possibly more so for the development of artificial intelligence

Emerging Challenges in Intelligent Management Information Systems Marcin Hernes, Jaroslaw Wątróbski, Artur Rot, 2024-12-18 This book contains the second volume of proceedings of

the ECAI 2024 Workshop on Intelligent Management Information Systems IMIS 2024 IMIS 2024 was part of the 27th European Conference on Artificial Intelligence ECAI 2024 held in Santiago de Compostela from October 19 2024 to October 24 2024 The book discusses emerging challenges related to implementing artificial intelligence in management information systems The main focus is put on knowledge management and machine learning methods in information systems artificial intelligence for decision support systems intelligent customer management methods hybrid artificial intelligence and multiple criteria decision analysis methods and advanced computational methods for support business processes and decision making The book is divided into three major parts covering the main issues related to the topic The first part presents issues related to the knowledge management in intelligent information systems The second part is devoted to application of machine learning in management information systems The third part presents problems related to multiple criteria decision analysis and computational methods The book has an interdisciplinary character therefore it is intended for a broad scope of readers including researchers students managers and employees of business organizations software developers IT and management specialists

Artificial Intelligence in Pathogenic Microorganism Research Chen Li,Yu-Dong Yao,Marcin Grzegorzek,2025-05-26 Infections caused by pathogenic microorganisms including bacteria viruses fungi and other eukaryotic microbes seriously threaten human health Traditional research methods and laboratory techniques have many limitations and focus more on the identification and classification of pathogenic microorganisms In recent years technologies such as whole genome sequencing and advanced bioinformatics analysis have promoted the research of pathogenic microorganisms However with the interplay of multiple factors like global climate change ecological and environmental changes urbanization social behavior and lifestyle changes pathogenic microorganisms transmission patterns and impact scope are gradually changing There is an urgent need for multidimensional technological approaches to achieve epidemiological monitoring and evolutionary direction prediction of pathogenic microorganisms Additionally more robust data processing and analysis capabilities are required for rapid identification and diagnosis monitoring of drug resistance development of antimicrobial drugs and vaccines and optimization of treatment plans Therefore Artificial Intelligence AI has entered our field of vision In the field of pathogenic microorganisms AI has shown tremendous potential In epidemiological research AI technology can quickly and automatically collect integrate and analyze the epidemic data of infectious diseases from different regions so as to predict the trend and scope of disease transmission and track the source of infection In the process of diagnosis and treatment of infectious diseases machine learning can not only analyze the microscopic images of pathogens but also analyze the genome sequences of multiple pathogens in a short time and predict their sensitivity or resistance to specific antibiotics greatly improving the efficiency and accuracy of diagnosis and treatment of infectious diseases In drug or vaccine development researchers can use AI models to predict efficient antigens for diseases such as HIV and influenza and thus design more effective vaccine candidates AI models can also analyze the interactions between drugs

pathogens and patients in order to design the optimal dosing regimen for each patient In a word AI can help human beings better deal with infectious diseases We welcome original reviews articles and other contributions in related fields which mainly include the following aspects 1 The application of AI in the differential diagnosis of pathogenic microorganisms 2 The application of AI in the formulation of anti infection treatment plans 3 The application of AI in monitoring and predicting the prevalence of pathogenic microorganisms 4 Application of AI in the prediction and prevention of infectious diseases caused by pathogenic microorganisms 5 The application of AI in the research and development of anti infective drugs and vaccines
