While Google doesn't specify a recommended length for SEO title tags, some say the ideal length is between 50–60 characters. This length is associated with higher search clicks and is less likely to be rewritten by Google. Most desktop and mobile browsers can display the first 50–60 characters of a title tag, and research suggests that titles under 60 characters have about a 90% chance of displaying properly in search engine results pages (SERPs). However, Google's title update prefers shorter titles, and titles that are too long are more likely to be rewritten.

Inscribed near a broken chain at the base of the Statue of Liberty are these words Give me your tired your poor Your huddled masses yearning to breathe free The wretched refuse of your teeming shore Send these the homeless tempest tossed to me I lift my lamp beside the golden door Lady Liberty proclaims freedom every day to anyone with a heart to hear her Yet although the opportunity to experience the benefits of

legal freedom exists in our nation many people still live in bondage to a number of injustices In One Nation Under God Dr Evans addresses freedom justice economics racism education and politics from a kingdom perspective Citizens will be moved to display biblical justice thus working to build a society based on the foundational principles of God s word If God s people are to reverse the course that this nation is heading down believers must care about what God cares about and implement specific strategies to change this nation This booklet is a part of the Life Under God series a 5 book series adapted from the 5 sections found in The Kingdom Agenda the legacy work of Dr Tony Evans This booklet is based on the One Nation under God section

Analytics and Intuition in the Process of Selecting Talent Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners
